The technical committees responsible for ACI committee reports and standards strive to avoid ambiguities, omissions, and errors in these documents. In spite of these efforts, the users of ACI documents occasionally find information or requirements that may be subject to more than one interpretation or may be incomplete or incorrect. Users who have suggestions for the improvement of ACI documents are requested to contact ACI. Proper use of this document includes periodically checking for errata at www.concrete.org/committees/errata.asp for the most up-to-date revisions.

ACI committee documents are intended for the use of individuals who are competent to evaluate the significance and limitations of its content and recommendations and who will accept responsibility for the application of the material it contains. Individuals who use this publication in any way assume all risk and accept total responsibility for the application and use of this information.

All information in this publication is provided “as is” without warranty of any kind, either express or implied, including but not limited to, the implied warranties of merchantability, fitness for a particular purpose or non-infringement.

ACI and its members disclaim liability for damages of any kind, including any special, indirect, incidental, or consequential damages, including without limitation, lost revenues or lost profits, which may result from the use of this publication.

It is the responsibility of the user of this document to establish health and safety practices appropriate to the specific circumstances involved with its use. ACI does not make any representations with regard to health and safety issues and the use of this document. The user must determine the applicability of all regulatory limitations before applying the document and must comply with all applicable laws and regulations, including but not limited to, United States Occupational Safety and Health Administration (OSHA) health and safety standards.

Order information: ACI documents are available in print, by download, on CD-ROM, through electronic subscription, or reprint and may be obtained by contacting ACI.

Most ACI standards and committee reports are gathered together in the annually revised *ACI Manual of Concrete Practice* (MCP).

This is a Reference Specification that the Architect/Engineer can apply to any construction project involving structural concrete by citing it in the Project Specifications. Checklists are provided to assist the Architect/Engineer in supplementing the provisions of this Reference Specification as needed by designating or specifying individual project requirements.

The first five sections of this document cover general construction requirements for cast-in-place structural concrete and slabs-on-ground. These sections cover materials and proportioning of concrete; reinforcement and prestressing steel; production, placing, finishing, and curing of concrete; formwork performance criteria and construction; treatment of joints; embedded items; repair of surface defects; and finishing of formed and unformed surfaces. Provisions governing testing, evaluation, and acceptance of concrete as well as acceptance of the structures are included. The remaining sections are devoted to architectural concrete, lightweight concrete, mass concrete, post-tensioned concrete, shrinkage-compensating concrete, industrial floor slabs, tilt-up construction, precast structural concrete, and precast architectural concrete.

Keywords: architectural; cold weather; compressive strength; durability; concrete slab; consolidation; curing; finish; formwork; grouting; hot weather; industrial floors; inspection; joints; lightweight concrete; mass concrete; mixture proportions; placing; precast; post-tensioned; prestressing steel; repair; reshoring; shoring; shrinkage-compensating; slabs-on-ground; steel reinforcement; testing; tilt-up; tolerance; welded wire.

CONTENTS

(mandatory portion follows)

Section 1—General requirements, p. 5

- 1.1—Scope
 - 1.1.1—Work specified
 - 1.1.2—Work not specified
 - 1.1.3—Units
- 1.2—Definitions
- 1.3—Referenced standards and cited publications
 - 1.3.1—Referenced standards
 - 1.3.2—Cited publications
 - 1.3.3—Field references
- 1.4—Standards-producing organizations
- 1.5—Submittals
 - 1.5.1—General
 - 1.5.2—Contractor’s quality control
- 1.6—Quality assurance and quality control
 - 1.6.1—General
 - 1.6.2—Responsibilities of Contractor
 - 1.6.3—Responsibilities of Owner’s testing agency
 - 1.6.4—Tests on hardened concrete in place
 - 1.6.5—Evaluation of concrete strength tests
 - 1.6.6—Acceptance of concrete strength
 - 1.6.7—Field acceptance of concrete
- 1.7—Acceptance of structure
 - 1.7.1—General
 - 1.7.2—Dimensional tolerances
 - 1.7.3—Appearance
 - 1.7.4—Strength of structure
 - 1.7.5—Durability
- 1.8—Protection of in-place concrete
 - 1.8.1—Loading and support of concrete
 - 1.8.2—Protection from mechanical injury

Section 2—Formwork and formwork accessories, p. 13

- 2.1—General

- 2.1.1—Description
- 2.1.2—Submittals
- 2.2—Products
 - 2.2.1—Materials
 - 2.2.2—Performance and design requirements
 - 2.2.3—Fabrication and manufacture
- 2.3—Execution
 - 2.3.1—Construction and erection of formwork
 - 2.3.2—Removal of formwork
 - 2.3.3—Reshoring and backshoring
 - 2.3.4—Strength of concrete required for removal of formwork
 - 2.3.5—Field quality control

Section 3—Reinforcement and reinforcement supports, p. 16

- 3.1—General
 - 3.1.1—Submittals
 - 3.1.2—Material storage and handling
- 3.2—Products
 - 3.2.1—Materials
 - 3.2.2—Fabrication
- 3.3—Execution
 - 3.3.1—Preparation
 - 3.3.2—Placing

Section 4—Concrete mixtures, p. 20

- 4.1—General
 - 4.1.1—Description
 - 4.1.2—Submittals
 - 4.1.3—Quality control
 - 4.1.4—Material storage and handling
- 4.2—Products
 - 4.2.1—Materials
 - 4.2.2—Performance and design requirements
 - 4.2.3—Proportioning
- 4.3—Execution
 - 4.3.1—Measuring, batching, and mixing
 - 4.3.2—Delivery

Section 5—Handling, placing, and constructing, p. 25

- 5.1—General
 - 5.1.1—Description
 - 5.1.2—Submittals
 - 5.1.3—Delivery, storage, and handling
- 5.2—Products
 - 5.2.1—Materials
 - 5.2.2—Performance and design requirements
- 5.3—Execution
 - 5.3.1—Preparation
 - 5.3.2—Placement of concrete
 - 5.3.3—Finishing formed surfaces
 - 5.3.4—Finishing unformed surfaces
 - 5.3.5—Sawed joints
 - 5.3.6—Curing and protection
 - 5.3.7—Repair of surface defects

Section 6—Architectural concrete, p. 30

- 6.1—General
