AMERICAN NATIONAL STANDARDS

By approving this American National Standard, the ANSI Board of Standards Review confirms that the requirements for due process, consensus, balance and openness have been met by B11 Standards, Inc., (the ANSI-accredited standards developing organization).

American National Standards are developed through a consensus process. Consensus is established when substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward resolution. This process brings together volunteers and/or seeks out the views of persons who have an interest in the topic covered by this publication. While B11 Standards, Inc., administers the process and establishes procedures to promote fairness in the development of consensus, it does not write the document and it does not independently test, evaluate or verify the accuracy or completeness of any information or the soundness of any judgments contained in its standards or guidelines.

American National Standards are promulgated through ANSI for voluntary use; their existence does not in any respect preclude anyone, whether they have approved the standards or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards. However, users, distributors, regulatory bodies, certification agencies and others concerned may apply American National Standards as mandatory requirements in commerce and industry.

The American National Standards institute does not develop standards and will in no circumstances give an interpretation of an American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute. Requests for interpretations should be addressed to the Secretariat (B11 Standards, Inc.).

B11 Standards, Inc., MAKES NO WARRANTY, EITHER EXPRESSED OR IMPLIED AS TO THE FITNESS OF MERCHANTABILITY OR ACCURACY OF THE INFORMATION CONTAINED WITHIN THIS STANDARD, AND DISCLAIMS AND MAKES NO WARRANTY THAT THE INFORMATION IN THIS DOCUMENT WILL FULFILL ANY OF YOUR PARTICULAR PURPOSES OR NEEDS. B11 Standards, Inc., disclaims liability for any personal injury, property or other damages of any nature whatsoever, whether special, indirect, consequential or compensatory, directly or indirectly resulting from the publication, use of, application or reliance on this document. B11 Standards, Inc., does not undertake to guarantee the performance of any individual supplier or seller's products or services by virtue of this standard or guide, nor does it take any position with respect to the validity of any patent rights asserted in connection with the items which are mentioned in or are the subject of this document, and B11 Standards, Inc., disclaims liability for the infringement of any patent resulting from the use of or reliance on this document. Users of this document are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

In publishing or making this document available, B11 Standards, Inc., is not undertaking to render professional or other services for or on behalf of any person or entity, nor is B11 Standards, Inc., undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment, or as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances.

B11 Standards, Inc., has no power, nor does it undertake to police or enforce conformance to the requirements of this document. B11 Standards, Inc., does not certify, test or inspect products, designs, or installations for safety or health purposes. Any certification or other statement of conformance to any health or safety-related information in this document shall not be attributable to B11 Standards, Inc., and is solely the responsibility of the certifier or maker of the statement.

NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken periodically to reaffirm, revise, or withdraw this standard. You may contact the Secretariat for current status information on this, or other B11 standards. Individuals interested in obtaining up-to-date information on standards can access this information at <http://www.nssn.org> (or by contacting ANSI). NSSN - A National Resource for Global Standards, provides a central point to search for standards information from worldwide sources and can connect those who seek standards to those who supply them.

Table of Contents

FOREWORD	v
Introduction	viii
1 Scope	1
1.1 Included machines	1
1.1.1 External cylindrical grinding machine	1
1.1.2 Centerless external cylindrical grinding	1
1.1.3 Surface grinding machine – peripheral grinding, reciprocating table, (horizontal spindle).....	2
1.1.4 Surface grinding machine – peripheral grinding, rotary table (horizontal spindle; table has a vertical axis of rotation)	2
1.1.5 Surface grinding machine – face grinding, reciprocating table (vertical spindle) ..	3
1.1.6 Surface grinding machine – face grinding, rotary table (vertical spindle; table has a vertical axis of rotation).....	3
1.1.7 Surface grinding – face grinding, Double disc surface grinding machine (includes either horizontal or vertical spindle configurations)	3
1.1.8 Tool & cutter grinding machine – peripheral and face grinding (includes multiple horizontal spindle configurations)	3
1.1.9 Cutting-off machine (guillotine type).....	4
1.1.10 Cutting-off machine (chop-saw type).....	4
1.1.11 Cutting-off machine (workpiece translation type)	4
1.1.12 Bench, pedestal or floorstand grinding machine – peripheral grinding	4
1.1.13 Pedestal grinding machine – face grinding (horizontal spindle)	5
1.1.14 Swing frame grinding machine – peripheral grinding/cutting-off	5
1.1.15 Automatic billet grinding machine – surface grinding (high pressure).....	5
1.2 Excluded machines	6
2 References	6
2.1 Normative references.....	6
2.2 Informative references	7
3 Definitions	8
4 Responsibility	10
4.1 Supplier responsibilities.....	10
4.2 User responsibilities	10
4.3 Personnel responsibilities.....	10
5 Risk assessment process	11
6 Design and construction	13
6.1 General requirements	13
6.1.1 Hazards associated with moving parts (other than point of operation hazards) ..	13
6.1.2 Hazards associated with broken or falling components.....	13
6.1.3 Stored energy	13
6.1.4 Exhaust provision	13
6.1.5 Flanges	14
6.1.6 Offhand grinding machine work rests.....	14
6.1.7 Limiting abrasive product speed.....	14
6.1.8 Direction of machine spindle thread	14
6.1.9 Length of machine spindle thread.....	15

6.1.10	Size of spindle or mount.....	15
6.1.11	Directional arrows	15
6.1.12	Work driving and holding equipment.....	15
6.1.13	Contact with high-temperature components.....	16
6.2	Electrical requirements.....	16
6.2.1	Power	16
6.2.2	Disconnect	16
6.2.3	Emergency stop.....	16
6.2.4	Voltage and grounds.....	16
6.2.5	Component failure.....	16
6.3	Operating control	17
6.3.1	General construction	17
6.3.2	Identification	17
6.3.3	Component location.....	17
6.3.4	Operating controls	17
6.3.5	Direction of operation of controls	19
6.3.6	Hydraulic and pneumatic components	20
6.4	Abrasive product mounting	20
6.4.1	General requirements for flanges.....	20
6.4.2	General requirements for faceplates.....	21
6.4.3	Run-out for collets.....	21
6.5	Abrasive product speeds	21
7	Layout, installation, testing and start-up for the grinding system	22
7.1	General	22
7.2	Layout 22	
7.2.1	Production operations	22
7.2.2	Set-up and maintenance.....	22
7.3	Installation.....	22
7.3.1	Foundation	22
7.3.2	Lifting of machine components	22
7.3.3	Anchoring.....	23
7.4	Lockout / tagout.....	23
7.4.1	Means	23
7.4.2	Procedure.....	23
7.4.3	Training	23
7.4.4	Supervision	23
7.5	Lighting	23
7.6	Testing and start-up.....	23
7.6.1	Procedures.....	23
7.6.2	Assigned personnel	23
7.6.3	Safeguarding.....	23
7.7	Speed check of machines – user’s responsibility	23
8	Safeguarding	24
8.1	Hazards associated with grinding machine operation, other than at the point of operation.	25
8.1.1	Hazards to personnel associated with power transmission.....	25
8.1.2	Hazards to personnel associated with moving parts (exclusive of power transmission components)	25

8.1.3	Hazards to personnel associated with flying particles and sparks originating from the point of operation.....	26
8.1.4	Hazards to personnel associated with unintended operation of grinding machines	26
8.1.5	Hazards to personnel associated with the containment of fluids such as coolant, lubricant, and hydraulic fluid and compressed gas.	26
8.2	Hazards at the point of operation	27
8.3	Abrasive product safeguarding	27
8.3.1	General requirements	27
8.3.2	Abrasive product guard exposure angles	27
8.3.3	Abrasive product guards	32
8.3.4	Material requirements and minimum dimensions	33
8.3.5	Abrasive product guards with removable side covers	35
8.3.6	Band-type guards – general specifications	36
9	Operation, maintenance and training	36
9.1	Operation and maintenance	36
9.1.1	Use of abrasive products — user’s responsibility.....	37
9.1.2	General maintenance	37
9.1.3	Arbor size	37
9.1.4	Bushing	37
9.1.5	Surface condition	37
9.1.6	Machine face plate.....	37
9.1.7	Tightening of the mounting nut	39
9.1.8	Abrasive product guards	40
9.1.9	Maintenance.....	40
9.2	Training	40
Annex A: Abrasive product guards, work zone enclosures and their combinations on stationary grinding machines		1
