IPC J-STD-001F
July 2014
Supersedes Revision E April 2010

JOINT INDUSTRY STANDARD

Requirements for Soldered Electrical and Electronic Assemblies

The Principles of Standardization

In May 1995 the IPC's Technical Activities Executive Committee (TAEC) adopted Principles of Standardization as a guiding principle of IPC's standardization efforts.

Standards Should:
- Show relationship to Design for Manufacturability (DFM) and Design for the Environment (DFE)
- Minimize time to market
- Contain simple (simplified) language
- Just include spec information
- Focus on end product performance
- Include a feedback system on use and problems for future improvement

Standards Should Not:
- Inhibit innovation
- Increase time-to-market
- Keep people out
- Increase cycle time
- Tell you how to make something
- Contain anything that cannot be defended with data

Notice

IPC Standards and Publications are designed to serve the public interest through eliminating misunderstandings between manufacturers and purchasers, facilitating interchangeability and improvement of products, and assisting the purchaser in selecting and obtaining with minimum delay the proper product for his particular need. Existence of such Standards and Publications shall not in any respect preclude any member or nonmember of IPC from manufacturing or selling products not conforming to such Standards and Publication, nor shall the existence of such Standards and Publications preclude their voluntary use by those other than IPC members, whether the standard is to be used either domestically or internationally.

Recommended Standards and Publications are adopted by IPC without regard to whether their adoption may involve patents on articles, materials, or processes. By such action, IPC does not assume any liability to any patent owner, nor do they assume any obligation whatever to parties adopting the Recommended Standard or Publication. Users are also wholly responsible for protecting themselves against all claims of liabilities for patent infringement.

IPC Position Statement on Specification Revision Change

It is the position of IPC's Technical Activities Executive Committee that the use and implementation of IPC publications is voluntary and is part of a relationship entered into by customer and supplier. When an IPC publication is updated and a new revision is published, it is the opinion of the TAEC that the use of the new revision as part of an existing relationship is not automatic unless required by the contract. The TAEC recommends the use of the latest revision. Adopted October 6, 1998

Why is there a charge for this document?

Your purchase of this document contributes to the ongoing development of new and updated industry standards and publications. Standards allow manufacturers, customers, and suppliers to understand one another better. Standards allow manufacturers greater efficiencies when they can set up their processes to meet industry standards, allowing them to offer their customers lower costs.

IPC spends hundreds of thousands of dollars annually to support IPC's volunteers in the standards and publications development process. There are many rounds of drafts sent out for review and the committees spend hundreds of hours in review and development. IPC's staff attends and participates in committee activities, typesets and circulates document drafts, and follows all necessary procedures to qualify for ANSI approval.

IPC's membership dues have been kept low to allow as many companies as possible to participate. Therefore, the standards and publications revenue is necessary to complement dues revenue. The price schedule offers a 50% discount to IPC members. If your company buys IPC standards and publications, why not take advantage of this and the many other benefits of IPC membership as well? For more information on membership in IPC, please visit www.ipc.org or call 847/597-2872.

Thank you for your continued support.

IPC J-STD-001F

Requirements for Soldered Electrical and Electronic Assemblies

If a conflict occurs between the English and translated versions of this document, the English version will take precedence.

A joint standard developed by the J-STD-001 development team including Task Group (5-22A), Task Group Asia (5-22ACN) and Task Group India (5-22AIN) of the Assembly and Joining Committees (5-20 and 5-20CN) of IPC

Supersedes:
J-STD-001E - April 2010
J-STD-001D - February 2005
J-STD-001C - March 2000
J-STD-001B - October 1996
J-STD-001A - April 1992

Users of this publication are encouraged to participate in the development of future revisions.

ADOPTION NOTICE

J-STD-001, "Requirements for Soldered Electrical and Electronic Assemblies", was adopted on 19-JUL-01 for use by the Department of Defense (DoD). Proposed changes by DoD activities must be submitted to the DoD Adopting Activity: Commander, US Army Tank-Automotive and Armaments Command, ATTN: AMSTA-TR-E/IE, Warren, MI 48397-5000. Copies of this document may be purchased from the The Institute for Interconnecting and Packaging Electronic Circuits, 2215 Sanders Road, Northbrook, IL 60062-6135. http://www.ipc.org/

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Acknowledgment

Any standard involving a complex technology draws material from a vast number of sources across many continents. Shown below are the principal members of the J-STD-001 development team including Task Group (5-22A), Task Group Asia (5-22ACN) and Task Group India (5-22AIN) of the Assembly and Joining Committees (5-20 and 5-20CN). It is not possible to include all of those who assisted in the evolution of this standard. To each of them, the members of the IPC extend their gratitude.

5.4.2 Turret and Straight Pin Terminals ... 18
5.4.3 Bifurcated Terminals ... 18
5.4.4 Slotted Terminals ... 19
5.4.5 Hook Terminals ... 20
5.4.6 Pierced or Perforated Terminals ... 20
5.4.7 Cup and Hollow Cylindrical Terminals – Placement ... 21
5.5 Soldering to Terminals ... 21
5.5.1 Bifurcated Terminals ... 21
5.5.2 Slotted Terminal ... 21
5.5.3 Cup and Hollow Cylindrical Terminals – Soldering ... 21
5.6 Jumper Wires ... 21
5.6.1 Insulation ... 21
5.6.2 Wire Routing ... 21
5.6.3 Wire Staking ... 21
5.6.4 Land ... 22
5.6.5 Supported Holes ... 22
5.6.6 SMT ... 22

6 THROUGH-HOLE MOUNTING AND TERMINATIONS ... 23
6.1 Through-Hole Terminations – General ... 23
6.1.1 Lead Forming ... 24
6.1.2 Termination Requirements ... 24
6.1.3 Lead Trimming ... 25
6.1.4 Interfacial Connections ... 25
6.1.5 Coating Meniscus In Solder ... 25
6.2 Supported Holes ... 26
6.2.1 Solder Application ... 26
6.2.2 Through-Hole Component Lead Soldering ... 26
6.3 Unsupported Holes ... 26
6.3.1 Lead Termination Requirements for Unsupported Holes ... 26

7 SURFACE MOUNTING OF COMPONENTS ... 27
7.1 Surface Mount Device Lead ... 27
7.1.1 Plastic Components ... 27
7.1.2 Forming ... 27
7.1.3 Unintentional Bending ... 28
7.1.4 Flat Pack Parallelism ... 28
7.1.5 Surface Mount Device Lead Bends ... 28
7.1.6 Flattened Leads ... 28
7.1.7 Parts Not Configured for Surface Mounting ... 28
7.2 Leaded Component Body Clearance ... 28
7.2.1 Axial-Leaded Components ... 28
7.3 Parts Configured for Butt/I Lead Mounting ... 28
7.4 Hold Down of Surface Mount Leads/ Components ... 28
7.5 Soldering Requirements ... 28
7.5.1 Misaligned Components ... 29
7.5.2 Unspecified and Special Requirements ... 29
7.5.3 Bottom Only Chip Component Terminations ... 30
7.5.4 Rectangular or Square End Chip Components – 1, 3 or 5 Side Termination ... 31
7.5.5 Cylindrical End Cap Terminations ... 32
7.5.6 Castellated Terminations ... 33
7.5.7 Flat Gull Wing Leads ... 34
7.5.8 Round or Flattened (Coined) Gull Wing Leads ... 35
7.5.9 J-Lead Terminations ... 36

7.5.10 Butt/I Terminations 37
7.5.11 Flat Lug Leads 39
7.5.12 Tall Profile Components Having Bottom Only Terminations 40
7.5.13 Inward Formed L-Shaped Ribbon Leads 40
7.5.14 Surface Mount Area Array Packages 42
7.5.15 Bottom Termination Components (BTC) 44
7.5.16 Components with Bottom Thermal Plane Terminations (D-Pak) 45
7.5.17 Flattened Post Connections 46
7.5.18 P-Style Terminations 47
7.6 Specialized SMT Terminations 47

8 CLEANING PROCESS REQUIREMENTS 48
8.1 Cleanliness Exemptions 48
8.2 Ultrasonic Cleaning 48
8.3 Post-Solder Cleanliness 48
8.3.1 Foreign Object Debris (FOD) 48
8.3.2 Flux Residues and Other Ionic or Organic Contaminants 48
8.3.3 Post-Soldering Cleanliness Designator 48
8.3.4 Cleaning Option 48
8.3.5 Test for Cleanliness 48
8.3.6 Testing 49

9 PCB REQUIREMENTS 50
9.1 Printed Circuit Board Damage 50
9.1.1 Blistering/Delamination 50
9.1.2 Weave Exposure/Cut Fibers 50
9.1.3 Haloing 50
9.1.4 Edge Delamination 50
9.1.5 Land/Conductor Separation 50
9.1.6 Land/Conductor Reduction in Size 50
9.1.7 Flexible Circuitry Delamination 50
9.1.8 Flexible Circuitry Damage 50
9.1.9 Burns 50
9.1.10 Non-Soldered Edge Contacts 50
9.1.11 Measles 50
9.1.12 Crazing 51
9.2 Marking 51
9.3 Bow and Twist (Warpage) 51
9.4 Depanelization 51

10 COATING, ENCAPSULATION AND STAKING (ADHESIVE) 51
10.1 Conformal Coating – Materials 51
10.2 Conformal Coating – Masking 51
10.3 Conformal Coating – Application 51
10.3.1 Conformal Coating on Components 51
10.3.2 Thickness 52
10.3.3 Uniformity 52
10.3.4 Transparency 52
10.3.5 Bubbles and Voids 52
10.3.6 Delamination 52
10.3.7 Foreign Objects Debris 52
10.3.8 Other Visual Conditions 52
10.3.9 Inspection 52
10.3.10 Rework or Touchup of Conformal Coating 53
10.4 Encapsulation 53
10.4.1 Application 53
10.4.2 Performance Requirements 53
10.4.3 Rework of Encapsulant Material 53
10.4.4 Encapsulant Inspection 53
10.5 Staking 53
10.5.1 Staking – Application 53
10.5.2 Staking – Adhesive 54
10.5.3 Staking – Inspection 54

11 WITNESS (TORQUE/ANTI-TAMPERING) STRIPE 54

12 PRODUCT ASSURANCE 54
12.1 Hardware Defects Requiring Disposition 54
12.2 Inspection Methodology 54
12.2.1 Process Verification Inspection 54
12.2.2 Visual Inspection 54
12.2.3 Sampling Inspection 55
12.3 Process Control Requirements 55
12.3.1 Opportunities Determination 55
12.4 Statistical Process Control 55

13 REWORK AND REPAIR 56
13.1 Rework 56
13.2 Repair 56
13.3 Post Rework/Repair Cleaning 56

APPENDIX A Guidelines for Soldering Tools and Equipment 57

APPENDIX B Minimum Electrical Clearance – Electrical Conductor Spacing 59

APPENDIX C J-STD-001 Guidance on Objective Evidence of Material Compatibility 61
