

ANSI/ESD S6.1-2014

ESD Association Standard

ANSI/ESD S6.1-2014
Revision of ANSI/ESD S6.1-2009

*For the Protection of Electrostatic
Discharge Susceptible Items*

Grounding

*Electrostatic Discharge Association
7900 Turin Road, Bldg. 3
Rome, NY 13440*

*An American National Standard
Approved October 10, 2014*

*ESD Association Standard for
the Protection of Electrostatic Discharge
Susceptible Items -*

Grounding

Approved September 24, 2013
ESD Association

**CAUTION
NOTICE**

Electrostatic Discharge Association (ESDA) standards and publications are designed to serve the public interest by eliminating misunderstandings between manufacturers and purchasers, facilitating the interchangeability and improvement of products and assisting the purchaser in selecting and obtaining the proper product for his particular needs. The existence of such standards and publications shall not in any respect preclude any member or non-member of the Association from manufacturing or selling products not conforming to such standards and publications. Nor shall the fact that a standard or publication is published by the Association preclude its voluntary use by non-members of the Association whether the document is to be used either domestically or internationally. Recommended standards and publications are adopted by the ESDA in accordance with the ANSI Patent policy.

Interpretation of ESDA Standards: The interpretation of standards in-so-far as it may relate to a specific product or manufacturer is a proper matter for the individual company concerned and cannot be undertaken by any person acting for the ESDA. The ESDA Standards Chairman may make comments limited to an explanation or clarification of the technical language or provisions in a standard, but not related to its application to specific products and manufacturers. No other person is authorized to comment on behalf of the ESDA on any ESDA Standard.

**DISCLAIMER OF
WARRANTIES**

THE CONTENTS OF ESDA'S STANDARDS AND PUBLICATIONS ARE PROVIDED "AS-IS," AND ESDA MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESSED OR IMPLIED, OF ANY KIND WITH RESPECT TO SUCH CONTENTS. ESDA DISCLAIMS ALL REPRESENTATIONS AND WARRANTIES, INCLUDING WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR USE, TITLE AND NON-INFRINGEMENT.

**DISCLAIMER OF
GUARANTY**

ESDA STANDARDS AND PUBLICATIONS ARE CONSIDERED TECHNICALLY SOUND AT THE TIME THEY ARE APPROVED FOR PUBLICATION. THEY ARE NOT A SUBSTITUTE FOR A PRODUCT SELLER'S OR USER'S OWN JUDGEMENT WITH RESPECT TO ANY PARTICULAR PRODUCT DISCUSSED, AND ESDA DOES NOT UNDERTAKE TO GUARANTEE THE PERFORMANCE OF ANY INDIVIDUAL MANUFACTURERS' PRODUCTS BY VIRTUE OF SUCH STANDARDS OR PUBLICATIONS. THUS, ESDA EXPRESSLY DISCLAIMS ANY RESPONSIBILITY FOR DAMAGES ARISING FROM THE USE, APPLICATION, OR RELIANCE BY OTHERS ON THE INFORMATION CONTAINED IN THESE STANDARDS OR PUBLICATIONS.

**LIMITATION ON
ESDA's LIABILITY**

NEITHER ESDA, NOR ITS MEMBERS, OFFICERS, EMPLOYEES OR OTHER REPRESENTATIVES WILL BE LIABLE FOR DAMAGES ARISING OUT OF, OR IN CONNECTION WITH, THE USE OR MISUSE OF ESDA STANDARDS OR PUBLICATIONS, EVEN IF ADVISED OF THE POSSIBILITY THEREOF. THIS IS A COMPREHENSIVE LIMITATION OF LIABILITY THAT APPLIES TO ALL DAMAGES OF ANY KIND, INCLUDING WITHOUT LIMITATION, LOSS OF DATA, INCOME OR PROFIT, LOSS OF OR DAMAGE TO PROPERTY AND CLAIMS OF THIRD PARTIES.

FOREWORD

The single most important concept in the field of static control is grounding. Attaching all electrically conductive and dissipative items in the workplace to ground allows built-up electrostatic charges to equalize with ground potential. A grounded conductor (includes dissipative items) cannot hold a static charge.

Electrically interconnecting all electrically conductive and dissipative items (bonding) allows charge to equalize across these items without actual contact to ground. This provides static control in areas where an actual connection to ground may not be accessible, such as in a field service environment. Electrically bonded conductors and dissipative items share stored electrical charge and therefore have no difference in electrical potential between them. Many types of Electrostatic Discharge (ESD) susceptible parts can be handled within a bonded system without causing damage.

Grounding of conductors for static control purposes may not provide sufficient grounding for Electromagnetic Interference (EMI) reduction or control. Low impedance electrical connections are required for EMI grounding and bonding while static grounding can be accomplished with relatively high resistance in connection points as well as along the discharge path.

Users of this document need to consider the National Electric Code or other applicable laws and electrical system designs and specifications in the country where an ESD control program plan is being implemented.

This standard¹ was originally approved on September 24, 1991 and was designated EOS/ESD-S6.1-1991. ANSI/ESD S6.1-1999 was a reaffirmation, re-designation of EOS/ESD-S6.1-1991 and approved on May 16, 1999. ANSI/ESD S6.1-2005 was a reaffirmation of ANSI/ESD S6.1-1999 and approved on June 12, 2005. ANSI/ESD S6.1-2009 was a reaffirmation of ANSI/ESD S6.1-2005 and was approved on May 18, 2009. Two editorial changes were made in ANSI/ESD S6.1-2009: edited one sentence removing the word “ground” from “groundable point ground”; and added a clarification sentence in paragraph 7.2.2 to reinforce the point that the AC equipment grounding conductor needs to be measured while evaluating systems with both AC equipment ground and Auxiliary ground. ANSI/ESD S6.1-2014 is a revision of ANSI/ESD S6.1-2009 and was approved on September 24, 2013.

At the time ANSI/ESD S6.1-2014 was prepared, the 6.0 Grounding Subcommittee had the following members:

David E. Swenson, Chairperson
Affinity Static Control Consulting, L.L.C.

Ron Gibson
Advanced Static Control Consulting

John Kinnear, Jr.
IBM

The following individuals contributed to the development of ANSI/ESD S6.1-2005:

Thomas Albano
Exelis, Inc. Geospatial Systems

Gene Monroe
NASA LARC

¹ **ESD Association Standard (S):** A precise statement of a set of requirements to be satisfied by a material, product, system or process that also specifies the procedures for determining whether each of the requirements is satisfied.

At the time ANSI/ESD S6.1-2009 was prepared, the 6.0 Grounding Subcommittee had the following members:

David E. Swenson, Chairperson
Affinity Static Control Consulting, L.L.C.

John Kinnear, Jr.
IBM

At the time ANSI/ESD S6.1-2005 was prepared, the 6.0 Grounding Subcommittee had the following members:

David E. Swenson, Chairperson
Affinity Static Control Consulting, L.L.C.

Steven Gerken
United States Air Force

Ronald Gibson
Celestica International, Inc.

John Kinnear, Jr.
IBM

Johanna Morris
Components Intel
de Costa Rica

Karen Yi
Lockheed Martin

The following individuals contributed to the development of ANSI/ESD S6.1-2005:

Arizona Chapter
ESD Association

Harold K. Aronson
Work Surfaces Corporation

Les Avery
Sarnoff Corporation

Godfrey (Ben)
Baumgartner
Lockheed

Michael T. Brandt
Marketing Resources, Ltd.

Stephen Halperin
SH&A

James Horvat
US Air Force

Whitson Kirk
Allied-Signal, Inc.

Howard Myers
Motorola

North Central Chapter
ESD Association

Arvid Peterson
ECOS Electronics

Harley Richardson
(*Original Secretary*) AT&T

Jeffrey Scanlon
American Systems

David Swenson
3M

Roy Walker
SAR

At the time EOS/ESD-S6.1-1991 was prepared, the 6.0 Grounding Subcommittee had the following members:

	Bob Parr - Chairman Motorola GEG	
Lawrence Burich Lockheed	Melissa Feeney TAOS International	Charles E. Gerdel Sacramento Army Depot
Steven Gerken US Air Force	Don Hyman Storage Technology	Harry Jolliff, Secretary TRW
Raymond Kallman Pilgrim Electric	Mel Kamenir ITT Avionics	Stephen Koehn 3M
Adrienne Kudlish Digital Equipment	Charles Miller (Alt) US Air Force	Dale Tucker Flexco
Ed Weggeland Static Prevention	Joel Weidendorf IBM	Anthony Wind, Jr. Wind Enterprises
	John Winn JES International	

Table of Contents

1.0 PURPOSE AND SCOPE.....	1
1.1 PURPOSE	1
1.2 SCOPE	1
2.0 REFERENCED DOCUMENTS	1
3.0 DEFINITION OF TERMS.....	1
4.0 PERSONNEL SAFETY	2
5.0 TECHNICAL REQUIREMENTS.....	2
5.1 ESD GROUNDING/BONDING REFERENCE SYSTEMS.....	2
5.1.1 AC Equipment Ground.....	2
5.1.2 Auxiliary Ground.....	2
5.1.3 Equipotential Bonding	3
5.2 CONNECTIONS TO THE ESD GROUNDING/BONDING REFERENCE POINT	3
5.2.1 Common Point Ground	3
5.2.2 Auxiliary Ground System	5
5.2.3 Equipotential Bonding	5
5.3 OTHER CONSIDERATIONS.....	6
5.3.1 Metal Bench Tops	6
5.3.2 Isolated Ground Receptacles.....	6
5.3.3 ESD Technical Element Conductors.....	6
5.3.4 Vehicles.....	7
5.3.5 Mechanical Requirements	7
6.0 ELECTRICAL REQUIREMENTS.....	7
6.1 INSTRUMENTATION.....	7
6.1.1 DC Ohmmeter	7
6.1.2 AC Circuit Tester (Impedance Meter)	7
6.2 ESD GROUNDING SYSTEM VERIFICATION	7
6.2.1 Equipment Grounding Conductor	7
6.2.2 AC Equipment Ground and Auxiliary Ground Verification	7
6.3 TECHNICAL ELEMENTS	8
6.4 LEVEL 2 TECHNICAL ELEMENTS	10
7.0 TEST PROCEDURES	10
7.1 RECEPTACLE WIRING VERIFICATION	10
7.2 ESD GROUNDING/BONDING REFERENCE POINT TESTS	10
7.2.1 Facilities with AC Equipment Ground	10
7.2.2 Facilities with AC Equipment Ground and Auxiliary Ground	10
7.2.3 Field Service/Equipotential Bonding (Applications without AC Equipment Ground) .	11

ANNEXES
