This standard was developed by a consensus standards development process that has been accredited by the American National Standards Institute (ANSI). Accreditation by ANSI, a voluntary accreditation body representing public and private sector standards development organizations in the United States and abroad, signifies that the standards development process used by ASCE has met the ANSI requirements for openness, balance, consensus, and due process.

While ASCE’s process is designed to promote standards that reflect a fair and reasoned consensus among all interested participants, while preserving the public health, safety, and welfare that is paramount to its mission, it has not made an independent assessment of and does not warrant the accuracy, completeness, suitability, or utility of any information, apparatus, product, or process discussed herein. ASCE does not intend, nor should anyone interpret, ASCE’s standards to replace the sound judgment of a competent professional, having knowledge and experience in the appropriate field(s) of practice, nor to substitute for the standard of care required of such professionals in interpreting and applying the contents of this standard.

ASCE has no authority to enforce compliance with its standards and does not undertake to certify products for compliance or to render any professional services to any person or entity.

ASCE disclaims any and all liability for any personal injury, property damage, financial loss, or other damages of any nature whatsoever, including without limitation any direct, indirect, special, exemplary, or consequential damages resulting from any person’s use of, or reliance on, this standard. Any individual who relies on this standard assumes full responsibility for such use.

ASCE STANDARDS

In 2014, the Board of Direction approved revisions to the ASCE Rules for Standards Committees to govern the writing and maintenance of standards developed by ASCE. All such standards are developed by a consensus standards process managed by the ASCE Codes and Standards Committee (CSC). The consensus process includes balloting by a balanced standards committee and reviewing during a public comment period. All standards are updated or reaffirmed by the same process every five to ten years. Requests for formal interpretations shall be processed in accordance with Section 7 of ASCE Rules for Standards Committees, which are available at www.asce.org. Errata, addenda, supplements, and interpretations, if any, for this standard can also be found at www.asce.org.

The provisions of this document have been written in permissive language and, as such, offer to the user a series of

options or instructions but do not prescribe a specific course of action. Significant judgment has been left to the user of this document.

This standard has been prepared in accordance with recognized engineering principles and should not be used without the user's competent knowledge for a given application. The publication of this standard by ASCE is not intended to warrant that the information contained therein is suitable for any general or specific use, and ASCE takes no position respecting the validity of patent rights. The user is advised that the determination of patent rights or risk of infringement is entirely his or her own responsibility.

A complete list of currently available standards is available in the ASCE Library (<http://ascelibrary.org/page/books/s-standards>).

ACKNOWLEDGMENTS

Many people contributed materially to this document by their comments, review, illustrations, and photographs. The primary authors of this document were the members of the Atmospheric Water Management Standards Committee of the ASCE Environmental and Water Resources Institute:

Arie Ben-Zvi
Bruce A. Boe (Past Chair)
George W. Bomar (Representative to the EWRI Standards Development Council and Immediate Past Chair)
Robert R. Czys
Thomas P. DeFelice (Secretary)

CONTENTS

ASCE STANDARDS	iii
ACKNOWLEDGMENTS	v
1 SCOPE	1
1.1 Applicable Documents	1
2 THE HAIL PROBLEM	3
2.1 Historical Perspective	3
2.2 The Status of Hail Suppression Technology	4
2.2.1 American Society of Civil Engineers	4
2.2.2 Weather Modification Association	5
2.2.3 American Meteorological Society	5
2.2.4 The National Research Council and Weather Modification Association Viewpoints	5
3 HAIL CONCEPTS	7
3.1 Requirements for Hail Development	7
3.2 The Scientific Basis for Hail Suppression.	8
3.2.1 Beneficial Competition	8
3.2.2 Early Rainout	8
3.2.3 Trajectory Lowering	9
3.2.4 Promotion of Coalescence	9
3.2.5 Dynamic Effects	9
3.2.6 Other Concepts	9
3.3 Concept Visualization	9
3.4 Cloud Modeling	10
4 THE DESIGN OF HAIL SUPPRESSION OPERATIONS	11
4.1 Definition of Project Scope	11
4.1.1 Historical Hail Losses	11
4.1.2 Historical Radar Data	11
4.1.3 Basic Project Area Concepts	11
4.1.4 Initial Design Considerations	12
4.1.5 Climatology	12
4.2 Seeding Agent Selection.	12
4.2.1 Silver Iodide	13
4.2.2 Dry Ice	14
4.2.3 Other Ice Nucleants	14
4.2.4 Hygroscopic Agents	14
4.2.5 Quality Control	14
4.3 Delivery Methods	15
4.3.1 Airborne Application	15
4.3.2 Ground-Based Ice Nucleus Generator Networks	17
4.3.3 Rockets and Artillery	17
4.4 Meteorological Data Collection and Forecasting	19
4.4.1 Forecasting and Nowcasting.	19
4.4.1.1 Government Forecast Information.	19
4.4.1.2 On-Site Operational Forecasts	19
4.4.2 Remote Sensing	19
4.4.2.1 Meteorological Radar	19
4.4.2.2 Satellite Data	21
4.4.2.3 Lightning Location.	22

4.4.3	Visual Cloud Appearance	23
4.4.4	Updraft	23
4.4.5	Numerical Cloud Modeling	23
4.4.5.1	Predictive Modeling	23
4.4.5.2	Diagnostic Modeling	23
4.5	Selection and Siting of Equipment	25
4.5.1	Aircraft Considerations	25
4.5.1.1	In Situ Cloud Measurements	25
4.5.1.2	Cloud Ice Content	25
4.5.1.3	Cloud Water Content	25
4.5.1.4	Temperature	26
4.5.2	Placement of Ground Generators	26
4.5.3	Placement of Rocket Launchers or Artillery	27
4.6	Legal Issues	27
4.6.1	Potential for Litigation	27
4.6.2	Regulation	27
4.7	Environmental Concerns	27
4.7.1	Redistribution of Precipitation	28
4.7.2	Seeding Agent Safety	28
5	CONDUCT OF OPERATIONAL HAIL SUPPRESSION PROJECTS	29
5.1	The Operations Manual	29
5.2	Personnel Requirements	29
5.2.1	Meteorological Staff	29
5.2.2	Cloud Treatment Pilots	29
5.2.3	Support Personnel	30
5.3	Operational Decision Making	30
5.3.1	Chronology	30
5.3.2	Opportunity Recognition	31
5.3.2.1	Aircraft Flight Crews	31
5.3.2.2	Treatment by Ground-Based Generators	31
5.3.2.3	Treatment by Rocket or Artillery	31
5.4	Communications	31
5.5	Safety Considerations	32
5.5.1	Safety of Field Personnel	32
5.5.1.1	Radar Safety	32
5.5.1.2	Use, Handling, and Storage of Seeding Agents	32
5.5.1.3	Severe Weather Hazards	32
5.5.1.4	Aircraft Safety	32
5.5.2	Seeding Suspension Criteria	32
5.6	Public Relations, Information, and Involvement	33
6	EVALUATION OF HAIL SUPPRESSION EFFORTS	35
6.1	Project Area Evaluation Approaches	35
6.1.1	Randomized Versus Nonrandomized Programs	35
6.1.2	Selection of Target and Control Areas	35
6.1.2.1	Precipitation Patterns	35
6.1.2.2	Storm Frequency	35
6.1.2.3	Contamination	36
6.2	Evaluation Measures	36
6.2.1	Evaluations Using Direct Evidence	36
6.2.1.1	Hail Pad Networks	36
