

FINAL VERSION

VERSION FINALE

**Framework for energy market communications –
Part 451-3: Transmission capacity allocation business process (explicit or
implicit auction) and contextual models for European market**

**Cadre pour les communications pour le marché de l'énergie –
Partie 451-3: Processus métier d'attribution de la capacité de transport (vente
aux enchères explicite ou implicite) et modèles contextuels pour le marché
européen**

CONTENTS

FOREWORD.....	14
INTRODUCTION.....	16
1 Scope.....	17
2 Normative references	17
3 Terms and definitions	18
4 Document contextual model and message assembly model basic concepts	20
4.1 Overview	20
4.2 European style market package (ESMP) structure	22
4.3 From the European style market profile to the document contextual model	23
4.4 From the document contextual model to the message assembly model.....	23
4.5 From the assembly model to the XML schema	23
5 The transmission capacity allocation business process.....	23
5.1 Overall business context.....	23
5.2 Establish offered capacity process.....	25
5.3 Explicit auction process	26
5.3.1 Overview of explicit auction process	26
5.3.2 Bid and allocate capacity.....	26
5.3.3 Publish auction results.....	27
5.3.4 Trade and negotiate allocated capacity.....	27
5.3.5 Capacity rights resale	28
5.3.6 Possibility of curtailment of allocated capacity	28
5.3.7 Designate interconnection trade responsible for nomination	28
5.3.8 Nominate use of border capacity	29
5.3.9 Validate nominations	29
5.4 Implicit auction process	29
5.4.1 Overview implicit auction process	29
5.4.2 Submit bids and offers to local exchange.....	30
5.4.3 Implicit auction	30
5.4.4 Publish exchange results.....	30
5.4.5 Publish trade results	30
5.5 Business rules for the transmission capacity allocation process.....	31
5.5.1 General rules.....	31
5.5.2 Rules governing the Bid_MarketDocument.....	31
5.5.3 Rules governing the Capacity_MarketDocument	32
5.5.4 Rules governing the AllocationResult_MarketDocument.....	32
5.5.5 Rules governing the TotalAllocationResult_MarketDocument.....	33
5.5.6 Rules governing the Rights_MarketDocument.....	33
6 Contextual and assembly models	35
6.1 Bid contextual model.....	35
6.1.1 Overview of the model	35
6.1.2 IsBasedOn relationships from the European style market profile.....	36
6.1.3 Detailed Bid contextual model	36
6.2 Bid assembly model.....	43
6.2.1 Overview of the model	43
6.2.2 IsBasedOn relationships from the European style market profile.....	44
6.2.3 Detailed Bid assembly model.....	44

6.3	Capacity auction specification contextual model	48
6.3.1	Overview of the model	48
6.3.2	IsBasedOn relationships from the European style market profile	48
6.3.3	Detailed Capacity auction specification contextual model	49
6.4	Capacity auction specification assembly model	59
6.4.1	Overview of the model	59
6.4.2	IsBasedOn relationships from the European style market profile	59
6.4.3	Detailed Capacity auction specification assembly model	60
6.5	Capacity contextual model	67
6.5.1	Overview of the model	67
6.5.2	IsBasedOn relationships from the European style market profile	67
6.5.3	Detailed Capacity contextual model	68
6.6	Capacity assembly model	75
6.6.1	Overview of the model	75
6.6.2	IsBasedOn relationships from the European style market profile	75
6.6.3	Detailed Capacity assembly model	76
6.7	Allocation result contextual model	80
6.7.1	Overview of the model	80
6.7.2	IsBasedOn relationships from the European style market profile	81
6.7.3	Detailed Allocation result contextual model	81
6.8	Allocation result assembly model	90
6.8.1	Overview of the model	90
6.8.2	IsBasedOn relationships from the European style market profile	92
6.8.3	Detailed Allocation result assembly model	92
6.9	Total allocation result contextual model	97
6.9.1	Overview of the model	97
6.9.2	IsBasedOn relationships from the European style market profile	98
6.9.3	Detailed Total allocation result contextual model	99
6.10	Total allocation result assembly model	109
6.10.1	Overview of the model	109
6.10.2	IsBasedOn relationships from the European style market profile	109
6.10.3	Detailed Total allocation result assembly model	110
6.11	Implicit auction result contextual model	117
6.11.1	Overview of the model	117
6.11.2	IsBasedOn relationships from the European style market profile	118
6.11.3	Detailed Implicit auction result contextual model	118
6.12	Implicit auction result assembly model	126
6.12.1	Overview of the model	126
6.12.2	IsBasedOn relationships from the European style market profile	127
6.12.3	Detailed Implicit auction result assembly model	127
6.13	Publication contextual model	132
6.13.1	Overview of the model	132
6.13.2	IsBasedOn relationships from the European style market profile	133
6.13.3	Detailed Publication contextual model	133
6.14	Publication assembly model	142
6.14.1	Overview of the model	142
6.14.2	IsBasedOn relationships from the European style market profile	143
6.14.3	Detailed Publication assembly model	144
6.15	Rights contextual model	149

6.15.1	Overview of the model	149
6.15.2	IsBasedOn relationships from the European style market profile	150
6.15.3	Detailed Rights contextual model	151
6.16	Rights assembly model	160
6.16.1	Overview of the model	160
6.16.2	IsBasedOn relationships from the European style market profile	161
6.16.3	Detailed Rights assembly model	161

INTERNATIONAL ELECTROTECHNICAL COMMISSION

FRAMEWORK FOR ENERGY MARKET COMMUNICATIONS –

Part 451-3: Transmission capacity allocation business process (explicit or implicit auction) and contextual models for European market

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

DISCLAIMER

This Consolidated version is not an official IEC Standard and has been prepared for user convenience. Only the current versions of the standard and its amendment(s) are to be considered the official documents.

This Consolidated version of IEC 62325-451-3 bears the edition number 1.1. It consists of the first edition (2014-07) [documents 57/1457/FDIS and 57/1480/RVD] and its amendment 1 (2017-05) [documents 57/1755/CDV and 57/1825/RVC] The technical content is identical to the base edition and its amendment.

This Final version does not show where the technical content is modified by amendment 1. A separate Redline version with all changes highlighted is available in this publication.

International Standard IEC 62325-451-3 has been prepared by IEC technical committee 57: Power systems management and associated information exchange.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 62325 series, published under the general title *Framework forenergy market communications*, can be found on the IEC website.

The committee has decided that the contents of the base publication and its amendment will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

This standard is one of the IEC 62325 series which define protocols for deregulated energy market communications.

The principal objective of the IEC 62325 series of standards is to produce standards which facilitate the integration of market application software developed independently by different vendors into a market management system, between market management systems and market participant systems. This is accomplished by defining message exchanges to enable these applications or systems access to public data and exchange information independent of how such information is represented internally.

The common information model (CIM) specifies the basis for the semantics for this message exchange.

The European style market profile is based on different parts of the CIM IEC standard. The CIM is defined through a series of standards, i.e. IEC 62325-301, IEC 61970-301 and IEC 61968-11.

This document provides for the European style market profile the transmission capacity allocation business process based on either explicit or implicit auction that can be used throughout a European style market. This standard was originally based upon the work of the European Transmission System Operators (ETSO) Task Force EDI (Electronic Data Interchange) and then on the work of the European Network of Transmission System Operators (ENTSO-E) Working Group EDI.

FRAMEWORK FOR ENERGY MARKET COMMUNICATIONS –

Part 451-3: Transmission capacity allocation business process (explicit or implicit auction) and contextual models for European market

1 Scope

This part of IEC 62325 specifies a package for the transmission capacity allocation business process through explicit or implicit auctions and the associated document contextual models, assembly models and XML schema for use within European style markets.

This International standard is based on the European style market contextual model (IEC 62325-351). The scheduling business process covered by this International Standard is described in Clause 5.

The relevant aggregate core components (ACCs) defined in IEC 62325-351 have been contextualised into aggregated business information entities (ABIEs) to satisfy the requirements of these business processes.

The contextualised ABIEs have been assembled into the relevant document contextual models.

Related assembly models and XML schema for the exchange of transmission capacity allocation information between market participants are automatically generated from the assembled document contextual models.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
