Names: American Society of Civil Engineers. Committee on Adaptation to a Changing Climate. | Ayyub, Bilal M., editor.

Title: Climate-resilient infrastructure : adaptive design and risk management / prepared by the Committee on Adaptation to a Changing Climate; edited by Bilal M. Ayyub, Ph.D., P.E.

Description: Reston, Virginia: American Society of Civil Engineers, [2018] |

Series: ASCE manuals and reports on engineering practice; no. 140 |

Includes bibliographical references and index.

Identifiers: LCCN 2018037421 | ISBN 9780784415191 (hardcover: alk. paper) |

ISBN 9780784481905 (pdf) | ISBN 9780784481922 (epub)

Subjects: LCSH: City planning—Climatic factors. | Building, Stormproof. |

Infrastructure (Economics) | Sustainable urban development. | Environmental protection. | Environmental impact analysis.

Classification: LCC TD168.5 .A44 2018 | DDC 628—dc23

LC record available at <https://lcn.loc.gov/2018037421>

MANUALS AND REPORTS ON ENGINEERING PRACTICE

(As developed by the ASCE Technical Procedures Committee, July 1930, and revised March 1935, February 1962, and April 1982)

A manual or report in this series consists of an orderly presentation of facts on a particular subject, supplemented by an analysis of limitations and applications of these facts. It contains information useful to the average engineer in his or her everyday work, rather than findings that may be useful only occasionally or rarely. It is not in any sense a “standard,” however; nor is it so elementary or so conclusive as to provide a “rule of thumb” for nonengineers.

Furthermore, material in this series, in distinction from a paper (which expresses only one person’s observations or opinions), is the work of a committee or group selected to assemble and express information on a specific topic. As often as practicable the committee is under the direction of one or more of the Technical Divisions and Councils, and the product evolved has been subjected to review by the Executive Committee of the Division or Council. As a step in the process of this review, proposed manuscripts are often brought before the members of the Technical Divisions and Councils for comment, which may serve as the basis for improvement. When published, each work shows the names of the committees by which it was compiled and indicates clearly the several processes through which it has passed in review, so that its merit may be definitely understood.

In February 1962 (and revised in April 1982), the Board of Direction voted to establish a series titled “Manuals and Reports on Engineering Practice,” to include the Manuals published and authorized to date, future Manuals of Professional Practice, and Reports on Engineering Practice. All such Manual or Report material of the Society would have been refereed in a manner approved by the Board Committee on Publications and would be bound, with applicable discussion, in books similar to past Manuals. Numbering would be consecutive and would be a continuation of present Manual numbers. In some cases of joint committee reports, bypassing of Journal publications may be authorized.

A list of available Manuals of Practice can be found at <http://www.asce.org/bookstore>.

CONTENTS

| | |
|---|-------------|
| PREFACE | ix |
| ACKNOWLEDGMENTS | xi |
| ACRONYMS | xiii |
| 1. INTRODUCTION | 1 |
| 1.1 Problem Definition, Needs, and Significance of Impact | 1 |
| 1.2 Objective and Scope | 2 |
| 1.3 Why Standards Matter | 4 |
| 1.4 Structure of Manual of Practice | 5 |
| 1.5 Topics Warranting Additional Analysis | 6 |
| 1.6 Uses and Users | 8 |
| 1.7 References | 8 |
| 2. A CHANGING CLIMATE: PROBLEM DEFINITION | 11 |
| 2.1 Significance of Changes in Weather and Climate | 11 |
| 2.2 Consensus on Observed Changes in Historical Climate | 12 |
| 2.3 Understanding Drivers of Climate Change | 18 |
| 2.4 Projected Changes in Future Climate | 20 |
| 2.5 Implications for Infrastructure and System Performance | 25 |
| 2.6 References | 44 |
| 3. OBSERVATIONAL METHOD | 51 |
| 3.1 Background | 51 |
| 3.2 Modifying the Observational Method to Meet Design Needs for a Changing Climate | 53 |
| 3.3 Observational Method in Practice | 55 |
| 3.4 Looking Beyond the Observational Method | 64 |
| 3.5 References | 64 |

| | |
|---|------------|
| 4. CHARACTERIZATION OF EXTREMES AND MONITORING | 67 |
| 4.1 Introduction..... | 67 |
| 4.2 Extreme Precipitation..... | 68 |
| 4.3 Precipitation and Flooding..... | 77 |
| 4.4 Flooding | 106 |
| 4.5 Multihazard Scenarios | 112 |
| 4.6 Hazard Monitoring Versus Risk Monitoring..... | 118 |
| 4.7 Positioning Risk in the Context of Hydroclimatic Non-Stationarity | 118 |
| 4.8 References | 124 |
| 5. FLOOD DESIGN CRITERIA | 133 |
| 5.1 Coastal Flooding Components | 133 |
| 5.2 Design Flood Elevation Standards..... | 137 |
| 5.3 Climate Change–Informed Design Flood Elevation..... | 139 |
| 5.4 References | 147 |
| 6. FLOOD LOADS | 149 |
| 6.1 Introduction..... | 149 |
| 6.2 Design Flood Loads..... | 150 |
| 6.3 Load Combinations | 163 |
| 6.4 Deflection Criteria for Flood Loads | 166 |
| 6.5 Leakage and Seepage | 167 |
| 6.6 References | 170 |
| 7. ADAPTIVE DESIGN AND RISK MANAGEMENT..... | 173 |
| 7.1 Uncertainty and Risk..... | 173 |
| 7.2 Design Philosophies | 174 |
| 7.3 Climate-Resilient Infrastructure | 176 |
| 7.4 Adaptive Design in the Context of Hazard and Fragility Curves | 182 |
| 7.5 A Methodology for Adaptive Risk Management..... | 185 |
| 7.6 Target Risk Levels and Risk Rating System..... | 191 |
| 7.7 Life-Cycle Cost Analysis..... | 197 |
| 7.8 Real Options for Risk Management..... | 203 |
| 7.9 Coastal Adaptive Design and Adaptation | 204 |
| 7.10 References | 222 |
| 8. DATA AND INFORMATION SOURCES..... | 227 |
| 8.1 US Federal Data and Information Sources..... | 228 |
| 8.2 Understanding Climate Model Output and Its Utility | 232 |
| 8.3 References | 233 |

APPENDIXES
