## Library of Congress Cataloging-in-Publication Data

Names: LaMalva, Kevin J., editor. | Structures Engineering Institute (American Society of Civil Engineers). Fire protection Committee, editor.  
Title: Structural fire engineering / prepared by the Fire Protection Committee of the Structures Engineering Institute of the American Society of Civil Engineers; edited by Kevin J. LaMalva, P.E.  
Description: Reston, Virginia: American Society of Civil Engineers, [2018] | Series: ASCE manuals and reports on engineering practice; no. 138 | Includes bibliographical references and index.  
Identifiers: LCCN 2018024125 | ISBN 9780784415047 (hardcover: alk. paper) | ISBN 9780784481493 (pdf) | ISBN 9780784481714 (epub)  
Subjects: LCSH: Building, Fireproof.  
Classification: LCC TH1065 .S77 2018 | DDC 693.8/2—dc23  
LC record available at <https://lcn.loc.gov/2018024125>

# MANUALS AND REPORTS ON ENGINEERING PRACTICE

(As developed by the ASCE Technical Procedures Committee, July 1930, and revised March 1935, February 1962, and April 1982)

A manual or report in this series consists of an orderly presentation of facts on a particular subject, supplemented by an analysis of limitations and applications of these facts. It contains information useful to the average engineer in his or her everyday work, rather than findings that may be useful only occasionally or rarely. It is not in any sense a “standard,” however; nor is it so elementary or so conclusive as to provide a “rule of thumb” for nonengineers.

Furthermore, material in this series, in distinction from a paper (which expresses only one person’s observations or opinions), is the work of a committee or group selected to assemble and express information on a specific topic. As often as practicable the committee is under the direction of one or more of the Technical Divisions and Councils, and the product evolved has been subjected to review by the Executive Committee of the Division or Council. As a step in the process of this review, proposed manuscripts are often brought before the members of the Technical Divisions and Councils for comment, which may serve as the basis for improvement. When published, each work shows the names of the committees by which it was compiled and indicates clearly the several processes through which it has passed in review, so that its merit may be definitely understood.

In February 1962 (and revised in April 1982), the Board of Direction voted to establish a series titled “Manuals and Reports on Engineering Practice,” to include the Manuals published and authorized to date, future Manuals of Professional Practice, and Reports on Engineering Practice. All such Manual or Report material of the Society would have been refereed in a manner approved by the Board Committee on Publications and would be bound, with applicable discussion, in books similar to past Manuals. Numbering would be consecutive and would be a continuation of present Manual numbers. In some cases of joint committee reports, bypassing of Journal publications may be authorized.

# CONTENTS

<b>PREFACE</b> .....	ix
<b>ACKNOWLEDGMENTS</b> .....	xi
<b>PART 1: INTRODUCTION TO STRUCTURAL FIRE ENGINEERING DESIGN</b> .....	<b>1</b>
<b>1. INTRODUCTION AND KEY TERMINOLOGY</b> .....	<b>3</b>
1.1 Overview.....	3
1.2 Background.....	4
<b>2. DESIGN APPROACHES</b> .....	<b>15</b>
2.1 Overview.....	15
2.2 Standard Fire Resistance Design (SFRD).....	16
2.2.1 Standard Fire Testing.....	17
2.2.2 Calculation Methods.....	21
2.3 Structural Fire Engineering Design (SFED) .....	21
2.3.1 Professional Responsibility.....	22
<b>3. PERFORMANCE OBJECTIVES</b> .....	<b>27</b>
3.1 Minimum Performance Objectives .....	27
3.2 Discretionary Performance Objectives .....	28
<b>PART 2: THERMAL RESPONSE OF STRUCTURES UNDER FIRE</b> .....	<b>31</b>
<b>4. THERMAL BOUNDARY CONDITIONS</b> .....	<b>33</b>
4.1 Fuel Load .....	33
4.2 Fire Exposure Conditions .....	34
4.2.1 Enclosure Fires.....	37

4.2.2	Localized Fires.....	38
4.2.3	Exterior Fire Exposure.....	38
4.2.4	Traveling Fires.....	40
4.2.5	Post-Hazard Event Fires.....	42
4.3	Fire Exposure Calculation Methods.....	44
4.3.1	Algebraic Correlations.....	44
4.3.2	Zone Models.....	45
4.3.3	Field Models.....	45
4.3.4	Validation of Fire Models.....	46
<b>5.</b>	<b>MATERIAL THERMAL PROPERTIES.....</b>	<b>51</b>
5.1	Spray-Applied Fire Resistant Materials.....	52
5.2	Gypsum Board Products.....	56
5.3	Intumescent Coatings.....	59
5.4	Steel.....	61
5.5	Concrete.....	63
5.6	Masonry.....	68
5.7	Timber.....	71
<b>6.</b>	<b>HEAT TRANSFER CALCULATION.....</b>	<b>81</b>
6.1	Steel Structures.....	83
6.1.1	Variability of SFRM Thickness and Density.....	84
6.1.2	Localized Insulation Damage.....	85
6.1.3	Thermal Bridging.....	86
6.2	Concrete Structures.....	87
6.3	Timber Structures.....	87
6.4	Nonuniform Heating.....	88
6.5	Mechanical Integrity.....	89
6.6	Methods of Heat Transfer Analysis.....	91
6.6.1	Lumped Mass Method.....	91
6.6.2	Finite Element Method.....	93
6.6.3	Finite Difference Method.....	94
<b>PART 3: STRUCTURAL RESPONSE TO FIRE EFFECTS.....</b>		<b>99</b>
<b>7.</b>	<b>STRUCTURAL FIRE EFFECTS.....</b>	<b>101</b>
7.1	Overview.....	101
7.2	Fire Effects on Structural Demand and Capacity.....	103
7.2.1	Thermal Expansion and Contraction.....	103
7.2.2	Nonuniform Heating.....	104
7.2.3	Cooling Phase Effects.....	104
7.3	Failure Modes.....	105
7.3.1	Structural Steel.....	105
7.3.2	Reinforced Concrete and Masonry.....	107

7.3.3	Timber.....	110
7.3.4	Nonstructural Components.....	110
<b>8.</b>	<b>MECHANICAL MATERIAL PROPERTIES .....</b>	<b>115</b>
8.1	Overview.....	115
8.2	Mechanical Properties of Steel.....	117
8.2.1	Structural Steel.....	117
8.2.2	High-Strength Bolts .....	129
8.2.3	High-Strength Steel.....	140
8.2.4	Cold-Formed Steel .....	147
8.2.5	Steel Grades with Improved Properties.....	152
8.3	Mechanical Properties of Concrete and Reinforcing Steel .....	161
8.3.1	Concrete.....	161
8.3.2	Reinforcing Steel.....	174
8.3.3	Prestressing Steel.....	178
8.4	Mechanical Properties of Masonry.....	184
8.5	Mechanical Properties of Timber.....	186
8.5.1	Moisture Effects.....	187
8.5.2	Parallel-to-Grain Properties.....	187
8.5.3	Perpendicular-to-Grain Properties .....	189
8.5.4	Char Rates .....	190
<b>9.</b>	<b>STRUCTURAL ANALYSIS FOR FIRE EFFECTS.....</b>	<b>199</b>
9.1	Load Combinations .....	199
9.2	Structural Analysis Tools.....	201
9.2.1	Mapping Thermal Results to the Structural Model.....	201
9.2.2	Simplified Analytical Tools.....	202
9.2.3	Finite Element Analysis.....	203
9.3	Structural Analysis Methods.....	209
9.3.1	Primary Structural Framing .....	209
9.3.2	Composite Slabs and Floor Systems.....	210
9.3.3	Structural Connections.....	211
9.3.4	Structural Walls .....	213
<b>10.</b>	<b>STRUCTURAL ACCEPTANCE CRITERIA .....</b>	<b>217</b>
10.1	Overview.....	217
10.2	Structural Steel .....	218
10.2.1	Local Behavior .....	218
10.2.2	Gross Member Behavior.....	219
10.2.3	Connection Design.....	220
10.2.4	Compartmentalization .....	222
10.2.5	Egress Path Levelness.....	222
10.2.6	Exit Stairways .....	223

10.3	Composite Steel and Concrete .....	223
10.3.1	Local Behavior .....	223
10.3.2	Gross Member .....	224
10.3.3	Connection Design.....	227
10.4	Reinforced and Prestressed Concrete .....	227
10.4.1	Concrete Cover Spalling .....	227
10.4.2	Local and Global Behavior.....	228
10.4.3	Analytical Tools and Analysis .....	229
10.5	Timber.....	229
10.5.1	Gross Member .....	229
10.5.2	Connection Design.....	231
