# Permeable Interlocking Concrete Pavement

PUBLISHED BY THE AMERICAN SOCIETY OF CIVIL ENGINEERS

## Library of Congress Cataloging-in-Publication Data

Names: American Society of Civil Engineers.  
Title: ASCE/T&DI/ICPI 68-18 permeable interlocking concrete pavement.  
Other titles: Permeable interlocking concrete pavement  
Description: Reston, Virginia : American Society of Civil Engineers, [2018] | Includes bibliographical references and index.  
Identifiers: LCCN 2018041944 | ISBN 9780784415009 (alk. paper)  
Subjects: LCSH: Pavements, Concrete--Standards--United States. | Concrete roads--Standards--United States. | Concrete blocks--Standards--United States.  
Classification: LCC TE278 .A54 2018 | DDC 625.8/4--dc23  
LC record available at <https://lccn.loc.gov/2018041944>

This standard was developed by a consensus standards development process that has been accredited by the American National Standards Institute (ANSI). Accreditation by ANSI, a voluntary accreditation body representing public and private sector standards development organizations in the United States and abroad, signifies that the standards development process used by ASCE has met the ANSI requirements for openness, balance, consensus, and due process.

While ASCE's process is designed to promote standards that reflect a fair and reasoned consensus among all interested participants, while preserving the public health, safety, and welfare that is paramount to its mission, it has not made an independent assessment of and does not warrant the accuracy, completeness, suitability, or utility of any information, apparatus, product, or process discussed herein. ASCE does not intend, nor should anyone interpret, ASCE's standards to replace the sound judgment of a competent professional, having knowledge and experience in the appropriate field(s) of practice, nor to substitute for the standard of care required of such professionals in interpreting and applying the contents of this standard.

ASCE has no authority to enforce compliance with its standards and does not undertake to certify products for compliance or to render any professional services to any person or entity.

ASCE disclaims any and all liability for any personal injury, property damage, financial loss, or other damages of any nature whatsoever, including without limitation any direct, indirect, special, exemplary, or consequential damages, resulting from any person's use of, or reliance on, this standard. Any individual who relies on this standard assumes full responsibility for such use.

## ASCE STANDARDS

In 2014, the Board of Direction approved revisions to the ASCE Rules for Standards Committees to govern the writing and maintenance of standards developed by ASCE. All such standards are developed by a consensus standards process managed by the ASCE Codes and Standards Committee (CSC). The consensus process includes balloting by a balanced standards committee and reviewing during a public comment period. All standards are updated or reaffirmed by the same process every five to ten years. Requests for formal interpretations shall be processed in accordance with Section 7 of ASCE Rules for Standards Committees, which are available at [www.asce.org](http://www.asce.org). Errata, addenda, supplements, and interpretations, if any, for this standard can also be found at [www.asce.org](http://www.asce.org).

The provisions of this document are written in permissive language and, as such, offer the user a series of options or

instructions but do not prescribe a specific course of action. Significant judgment is left to the user of this document.

This standard has been prepared in accordance with recognized engineering principles and should not be used without the user's competent knowledge for a given application. The publication of this standard by ASCE is not intended to warrant that the information contained therein is suitable for any general or specific use, and ASCE takes no position respecting the validity of patent rights. The user is advised that the determination of patent rights or risk of infringement is entirely their own responsibility.

A complete list of currently available standards is available in the ASCE Library (<https://ascelibrary.org/page/books/s-standards>).

<b>ASCE STANDARDS</b> . . . . .	iii
<b>PREFACE</b> . . . . .	vii
<b>ACKNOWLEDGMENTS</b> . . . . .	ix
<b>1 GENERAL</b> . . . . .	<b>1</b>
1.1 Scope . . . . .	1
1.2 Referenced Standards . . . . .	1
1.3 Variations from This Standard . . . . .	1
1.4 Engineer Required . . . . .	1
<b>2. DEFINITIONS</b> . . . . .	<b>3</b>
2.1 General . . . . .	3
2.2 Terms . . . . .	3
2.3 Consensus Standards and Other Referenced Documents . . . . .	6
<b>3 PRELIMINARY INFORMATION FOR THE DESIGN OF PERMEABLE PAVEMENTS</b> . . . . .	<b>9</b>
3.1 Project Suitability . . . . .	9
3.2 Primary PICP Design Options . . . . .	9
3.3 PICP System Components . . . . .	9
<b>4 PERMEABLE PAVEMENT DESIGN</b> . . . . .	<b>15</b>
4.1 General . . . . .	15
4.2 Structural Analysis . . . . .	15
4.2.1 Traffic Loads . . . . .	17
4.2.2 Soil Subgrade Characterization . . . . .	17
4.2.3 Expansive Soils and Other Considerations . . . . .	18
4.2.4 Aggregate Base and/or Subbase . . . . .	18
4.2.5 Other Aggregate Base and Subbase Considerations . . . . .	18
4.2.6 Concrete Paver, Aggregate Jointing, and Bedding Properties . . . . .	23
4.2.7 Concrete Paver Laying Patterns . . . . .	23
4.2.8 Structural Behavior of the Aggregate Subbase . . . . .	24
4.2.9 Soil Subgrade Characterization and Behavior . . . . .	26
4.2.10 Input Parameters for Mechanistic-Empirical Design of PICP . . . . .	27
4.2.11 Subbase Thickness Design Tables . . . . .	27
4.2.12 Structural Design Life . . . . .	28
4.2.13 Geosynthetics . . . . .	28
4.2.14 Edge Restraints . . . . .	31
4.2.15 Pedestrian-Only Use . . . . .	31
4.3 Hydrologic Analysis . . . . .	31
4.3.1 Overview of the Hydrologic System . . . . .	34
4.3.1.1 Input—Direct Rainfall . . . . .	34
4.3.1.2 Input—Contributing Drainage Area and/or Run-On . . . . .	34
4.3.1.3 Output—Subgrade Infiltration . . . . .	34
4.3.1.4 Output—Underdrain Discharge . . . . .	36
4.3.1.5 Output—Surface Overflow . . . . .	37
4.3.2 Selection of the PICP System Type . . . . .	37
4.3.2.1 No-Infiltration System . . . . .	38
4.3.2.2 Full-Infiltration System . . . . .	38
4.3.2.3 Partial-Infiltration System . . . . .	39

4.3.3	Water Balance Calculations . . . . .	40
4.3.3.1	Inputs . . . . .	40
4.3.3.2	Preliminary Estimate of Required Storage Volume . . . . .	40
4.3.3.3	No-Infiltration System Design . . . . .	40
4.3.3.4	Full-Infiltration System Design . . . . .	42
4.3.3.5	Partial-Infiltration System Design . . . . .	42
4.4	Balancing Structural and Hydrologic Designs. . . . .	43
4.5	Additional Design Considerations . . . . .	43
4.5.1	Subgrade Scarification . . . . .	43
4.5.2	Slopes . . . . .	44
4.5.3	Underground Utility Treatment . . . . .	44
4.5.4	Monitoring Well . . . . .	45
4.5.5	Adjacent Buildings and Pavement Systems . . . . .	46
4.6	Water Quality Benefits. . . . .	46
5	CONSTRUCTION GUIDELINES. . . . .	49
5.1	Construction Steps . . . . .	49
5.2	Preconstruction Meeting . . . . .	49
5.3	Erosion and Sediment Control. . . . .	50
5.4	Construction Inspection Checklist . . . . .	50
6	MAINTENANCE GUIDELINES . . . . .	53
6.1	Pavement Maintenance. . . . .	53
6.2	Inspection Activities . . . . .	53
6.3	Infiltration Testing . . . . .	53
6.4	Routine Maintenance. . . . .	54
6.5	Remedial Maintenance. . . . .	54
6.6	Winter Maintenance . . . . .	54
APPENDIX A	DESIGN EXAMPLES. . . . .	55
APPENDIX B-1	GUIDE CONSTRUCTION SPECIFICATION, PERMEABLE INTERLOCKING CONCRETE PAVEMENT, U.S. VERSION . . . . .	59
APPENDIX B-2	GUIDE CONSTRUCTION SPECIFICATION, PERMEABLE INTERLOCKING CONCRETE PAVEMENT, CANADIAN VERSION. . . . .	65
APPENDIX C	EXAMPLES OF ORIFICE AND COMMON WEIR EQUATIONS. . . . .	71
APPENDIX D	PICP STRUCTURAL DESIGN USING AASHTO 1993, <i>GUIDE FOR DESIGN OF PAVEMENT STRUCTURES</i> . . . . .	73
APPENDIX E	APPROXIMATE CORRELATION BETWEEN PERMEABILITY AND UNIFIED SOIL CLASSIFICATION . . . . .	77
