

Australian Standard™

Walking tracks

Part 1: Classification and signage

This Australian Standard was prepared by Committee CS-029, Walking Track Signs. It was approved on behalf of the Council of Standards Australia on 14 May 2001 and published on 28 May 2001.

The following interests are represented on Committee CS-029:

A.C.T. Parks and Conservation Service
Australian and New Zealand Environment and Conservation Council
Australian Industry Group
Confederation of Bushwalking Clubs, N.S.W.
Department of Conservation and Land Management Western Australia
Department of Natural Resources, Qld
Department of Natural Resources and Environment, Vic.
Environment Protection Agency, Qld
Federation of Tasmanian Bushwalking Clubs
Federation of Victorian Walking Clubs
Interagency Working Group, Tas.
Ministry of Sport and Recreation Western Australia
N.S.W. National Parks and Wildlife Service
N.S.W. Police Service
Office for Recreation and Sport S.A.
Outdoor Recreation Council of Australia
Scouts Australia
State Forests of New South Wales
Victoria Police
Victorian National Parks Association
Youth Hostels Association of N.S.W.

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee CS-029, Walking Track Signs to supersede AS 2156—1978, *Code of practice for the design and use of markers and information signs for walking tracks*, which was withdrawn in July 1998.

In this revision the classification of tracks has been improved, as the recommended spacing and use of markers, the positioning and content of information signs, and the management and design of tracks and associated facilities are related to the particular class of track.

The Committee does not recommend the use of temporary markers, except when tracks and/or associated facilities are used as detours, or for special events.

STANDARDS AUSTRALIA

Australian Standard
Walking tracks

Part 1: Classification and signage

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE

This Standard provides a classification system for walking tracks, guidance for the design, fabrication and use of track markers, and information signs to be used for walking tracks.

The Standard also sets out guidelines for the erection of these markers and signs to ensure that while they will be readily visible, clear and easy to read, they will not detract from the landscape.

This Standard applies to outdoor areas where the environment is the focus of recreational activity.

The Standard does not include temporary track markers.

1.2 OBJECTIVE

The objective of this Standard is to provide managing authorities with guidance for walking track classification and signage in order to provide consistency of information to users of walking tracks. This is intended to minimize risk, preserve natural features and enhance recreation opportunities associated with the use of walking tracks.

1.3 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

AS

1428 Design for access and mobility (series)

2700 Colour Standards for general purposes

2899 Public information symbol signs

2899.1 Part 1: General information signs

AS/NZS

1906 Retroreflective materials and devices for road traffic control purposes

1906.1 Part 1: Retroreflective materials

1.4 DEFINITIONS

For the purposes of this Standard the definitions below apply.

1.4.1 Information sign

A sign which provides information related to the track and its use, including advisory signs, descriptive signs, interpretive signs, regulatory signs and warning signs.

1.4.1.1 Advisory sign

A sign which specifies recommended equipment and precautions for the use of a track.
