Australian/New Zealand Standard™

Safety of toys

**Part 11: Organic chemical
compounds—Methods of analysis**

AS/NZS 8124.11:2008

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee CS-018, Safety of Childrens Toys. It was approved on behalf of the Council of Standards Australia on 26 February 2008 and on behalf of the Council of Standards New Zealand on 7 March 2008.
This Standard was published on 28 April 2008.

The following are represented on Committee CS-018:

Australian Chamber of Commerce and Industry
Australian Competition and Consumer Commission
Australian Consumers' Association
Australian Retailers Association
Australian Toy Association
Consumers Affairs Victoria
Consumers' Federation of Australia
Kidsafe National
Ministry of Consumer Affairs (New Zealand)
National Acoustic Laboratories
New Zealand Toy Distributors Association
Office of Consumer and Business Affairs South Australia
Office of Consumer Affairs and Fair Trading (Tasmania)
Office of NSW Consumer Protection Agency
Pigment Ecological & Toxicological Technical Committee of Australia
Queensland Health
SafeKids (New Zealand)
The Children's Hospital at Westmead

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 07378.

RECONFIRMATION NOTICE

Technical Committee CS-018 has reviewed the content of this publication and in accordance with Standards Australia procedures for reconfirmation, it has been determined that the publication is still valid and does not require change.

Certain documents referenced in the publication may have been amended since the original date of publication. Users are advised to ensure that they are using the latest versions of such documents as appropriate, unless advised otherwise in this Reconfirmation Notice.

Approved for reconfirmation in accordance with Standards Australia procedures for reconfirmation on 24 January 2018.

Approved for reconfirmation in New Zealand on behalf of the New Zealand Standards Approval Board on 20 July 2018.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee CS-018, Safety of Childrens Toys.

The objective of this Standard is to specify methods for the analysis of toy and toy material extracts prepared according to the sampling procedures in AS 8124.10, to enable assessment of compliance with the chemical requirements specified in AS 8124.9.

This Standard is identical with, and has been reproduced from EN 71-11:2005, *Safety of toys—Part 11: Organic chemical compounds—Methods of analysis*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text ‘this European Standard’ should read ‘this Australian Standard’.
- (c) A full point should be substituted for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to European Standard</i>	<i>Australian/New Zealand Standard</i>
EN	AS/NZS
71 Safety of toys	8124 Safety of toys
71-9 Part 9: Organic chemical compounds—Requirements	8124.9 Part 9: Organic chemical compounds—Requirements
71-10 Part 10: Organic chemical compounds—Sample preparation and extraction	8124.10 Part 10: Organic chemical compounds—Sample preparation and extraction

Documents not listed have not been adopted as Australian or Australian/New Zealand Standards.

The term ‘informative’ has been used in this Standard to define the application of the annex to which it applies. An ‘informative ‘annex’ is only for information and guidance.

Australian/New Zealand Standard
Safety of toys
Part 11: Organic chemical compounds—Methods of analysis

1 Scope

This Part 11 of the European Standard EN 71 for safety of toys specifies methods for the analysis of toy and *toy material* extracts prepared according to the sampling procedures in EN 71-10, to enable assessment of compliance with the chemical requirements specified in EN 71-9.

This European Standard specifies analytical methods for the identification and determination of the following groups of organic chemicals:

- Flame retardants
- Colourants
- Primary aromatic amines
- Monomers and solvents
- Wood preservatives
- Preservatives
- Plasticisers

NOTE 1 Methods for formaldehyde in accessible textile components of toys; accessible paper components of toys; and accessible resin-bonded wood components of toys are specified in EN 71-9.

NOTE 2 The method for free formaldehyde as a preservative is specified in EN 71-10.

2 Normative references

The following referenced documents are indispensable for the application of this European Standard. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 71-9:2005, *Safety of toys – Part 9: Organic chemical compounds – Requirements*

EN 71-10:2005, *Safety of toys – Part 10: Organic chemical compounds – Sample preparation and extraction*

EN ISO 3696, *Water for analytical laboratory use – Specification and test methods (ISO 3696:1987)*

3 Terms and definitions

For the purposes of this European Standard, the following terms and definitions apply.

3.1

action limit

routinely-achievable limit of quantification for a particular substance using the specified method of analysis

3.2

aqueous migrate

liquid obtained after extracting a *toy material* according to the procedure specified in Clause 6 of EN 71-10:2005

3.3

test portion

portion of the laboratory sample prepared for analysis

3.4

toy material

material from which toys and toy components are made

NOTE This definition differs from that given in EN 71-3
