

Australian/New Zealand Standard™

**Polybutylene (PB) plumbing pipe
systems**

**Part 1: Polybutylene (PB) pipe extrusion
compounds**

AS/NZS 2642.1:2007

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee PL-006, Polyolefin Pipe Systems. It was approved on behalf of the Council of Standards Australia on 26 October 2006 and on behalf of the Council of Standards New Zealand on 23 March 2007.

This Standard was published on 18 April 2007.

The following are represented on Committee PL-006:

AUSTAP
CSIRO Manufacturing & Infrastructure Technology
Certification Interests (Australia)
Energy Networks Association
Engineers Australia
Master Plumbers, Gasfitters and Drainlayers New Zealand
New Zealand Water & Waste Association
Plastics Industry Pipe Association of Australia
Plastics New Zealand
Water Services Association of Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com or Standards New Zealand web site at www.standards.govt.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of Standards Australia or the New Zealand Standards Executive at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 05540.

Australian/New Zealand Standard™

Polybutylene (PB) plumbing pipe systems

Part 1: Polybutylene (PB) pipe extrusion compounds

Originated as AS 2642.1—1983.
Jointly revised and designated AS/NZS 2642.1:1994.
Second edition 2007.
Reissued incorporating Amendment No. 1 (November 2018).

PREFACE

This Standard was prepared by the Joint Australia/New Zealand Standards Committee PL/006 on Polyolefin Pipe Systems, to supersede AS 2642.1—1994.

This Standard incorporates Amendment No. 1 (November 2018). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.

The Standard is Part 1 of a series of polybutylene pipe system Standards. Other Standards in the series are as follows:

AS/NZS

- 2642 Polybutylene (PB) plumbing pipe systems
- 2642.2 Part 2: Polybutylene (PB) pipe for hot and cold water applications
- 2642.3 Part 3: Mechanical jointing fittings for use with polybutylene (PB) pipes for hot and cold water applications

The objective of this Standard is to provide manufacturers and purchasers with a standard specification that ensures the extrusion compound used for these products is suitable.

The term ‘normative’ has been used in this Standard to define the application of the appendix to which it applies. A ‘normative’ appendix is an integral part of a Standard.

STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

Australian/New Zealand Standard
Polybutylene (PB) plumbing pipe systems

Part 1: Polybutylene (PB) pipe extrusion compounds

1 SCOPE

This Standard specifies requirements for polybutylene extrusion compounds suitable for making polybutylene pipe for hot and cold water applications.

NOTE: Polybutylene compound complying with this Standard is not intended to be manufactured into pipes for use in gas reticulation.

2 APPLICATION

Means for demonstrating compliance with this Standard shall be in accordance with Appendix A.

3 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

AS

1199	Sampling procedures for inspection attributes
1199.1	Part 1: Sampling schemes indexed by acceptance quality limit (AQL) for lot-by-lot inspection

AS/NZS

1462	Methods of test for plastics pipes and fittings
1462.6	Method 6: Method for hydrostatic pressure testing of pipes
1462.14	Method 14: Method for determination of the light transmission of pipe
1462.27	Method 27: Determination of toluene extract of carbon black
