

Australian/New Zealand Standard™

**Acrylonitrile butadiene styrene (ABS)
compounds, pipes and fittings for
pressure applications**

AS/NZS 3518:2013

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee PL-021, PVC, ABS and Polyamide Pipe Systems. It was approved on behalf of the Council of Standards Australia on 4 February 2013 and on behalf of the Council of Standards New Zealand on 25 January 2013.
This Standard was published on 19 February 2013.

The following are represented on Committee PL-021:

Association of Accredited Certification Bodies
Australian Chamber of Commerce and Industry
Engineers Australia
Local Government New Zealand
Master Plumbers, Gasfitters and Drainlayers New Zealand
National Plumbing Regulators Forum
Plastics and Chemicals Industries Association
Plastics Industry Pipe Association of Australia
Plastics New Zealand
Water New Zealand
Water Services Association of Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com or Standards New Zealand web site at www.standards.govt.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of Standards Australia or the New Zealand Standards Executive at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS/NZS 3518.

Australian/New Zealand Standard™

Acrylonitrile butadiene styrene (ABS) compounds, pipes and fittings for pressure applications

Originated in Australia in part as AS 3518.1—1988 and AS 3818.2—1988.
Previous and first Joint edition AS/NZS 3518:2004.
Second edition 2013.
Reissued incorporating Amendment No. 1 (December 2018).

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee PL-021, PVC, ABS and Polyamide Pipe Systems, to supersede AS/NZS 3518:2004, *Acrylonitrile butadiene styrene (ABS) pipes, compounds and fittings for pressure applications*.

This Standard incorporates Amendment No. 1 (December 2018). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.

The objective of this document is to provide a standard specification for manufacturers and purchasers of these products.

This revision updates the references to some of the test methods and changes the frequency at which type tests are to be performed on pipes and moulded fittings.

Statements expressed in mandatory terms in notes to tables and figures are deemed to be requirements of this Standard. Other notes are for information and guidance only.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

Australian/New Zealand Standard**Acrylonitrile butadiene styrene (ABS) compounds, pipes and fittings for pressure applications**

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE

This Standard specifies the performance requirements for acrylonitrile butadiene styrene (ABS) compounds (ABS 120, ABS 140, ABS 160 and ABS 180), pipes and fittings for the conveyance of liquids under pressure in applications above and below ground. The Standard contains dimensions for three ranges of pipe sizes, Series 1, Series 2 and Series 3.

Series 1 and 3 pipes are compatible with ISO 161 size series diameters, Series 2 are cast iron compatible sizes in accordance with AS/NZS 2280.

NOTE: Pipes and fittings manufactured to this Standard should be used and installed only in accordance with AS/NZS 3690, AS/NZS 2566.2 and AS 4041, as applicable.

Methods of demonstrating compliance with this Standard are given in Appendix A.

1.2 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

AS

- | | |
|--------|--|
| 1199 | Sampling procedures and tables for inspection by attributes |
| 1199.1 | Part 1: Sampling schemes indexed by acceptance quality limit (AQL) for lot-by-lot inspection |
| 1722 | Pipe threads of Whitworth form |
| 1722.1 | Part 1: Sealing pipe threads |
| 1722.2 | Part 2: Fastening pipe threads |
| 2129 | Flanges for pipes, valves and fittings |
| 2888 | Methods of testing plastics waste fittings |
| 2888.1 | Method 1: Method for determining the suitability of connection threads of BSP form |
| 4041 | Pressure piping |

AS/NZS

- | | |
|---------|--|
| 1462 | Methods of test for plastics pipes and fittings |
| 1462.1 | Method 1: Method for determining the dimensions of pipes and fittings |
| 1462.3 | Method 3: Method for determining the impact characteristics of pipes |
| 1462.4 | Method 4: Method of determining reversion of UPVC pipes |
| 1462.6 | Method 6: Thermoplastics pipes, fittings and assemblies for the transport of fluids under pressure—Resistance to internal pressure |
| 1462.8 | Method 8: Method of testing the leaktightness of assemblies |
| 1462.11 | Method 11: Method for high temperature stress-relief testing of fittings |
| 1462.16 | Method 16: Method for high temperature testing of pipe |
| 1462.28 | Method 28: Method for the assessment of the degree of pigment or carbon black dispersion in polyolefin pipes, fittings and compounds |
