Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian StandardsTM and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia, GPO Box 5420, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 04434.

PREFACE

This Standard was prepared by the Australian members of the Joint Standards Australia/Standards New Zealand Committee IT-014 Health Informatics. After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian, rather than an Australian/New Zealand Standard.

This Standard was prepared by the IT-014-10 Electronic Commerce Sub-Committee under the direction from the IT-014 Health Informatics Committee in response to the Commonwealth Government's objectives for National Standards within the health sector.

The objective of this Standard is to describe the content of the turnover order, rebate claim, rebate claim response, messaging rules and process logic

It is the sixth part in a series of documents dealing with health supply chain messaging as follows:

AS

- 5023 Health supply chain messaging
- 5023.1 Part 1: Messaging rules and process logic
- 5023.2 Part 2: Datasets
- 5023.3 Part 3: Messaging rules and process logic—Secondary transactions
- 5023.4 Part 4: Dataset content—Secondary transactions
- 5023.5 Part 5: Messaging rules and process logic—Turnover order, turnover order status, rebate claim, rebate claim response
- 5023.6 Part 6: Dataset content—Turnover order status, rebate claim, rebate claim response (this Standard)

FOREWORD

This Standard describes the content of the turnover order, rebate claim and rebate claim response messages. The messaging rules and process logic for the datasets are described in AS 5023.5.

Parts 5 and 6 of the AS 5023 series contains supplementary messages to the previously published message sets in AS 5023, Parts 1 to 4, and is intended for use by trading partners currently using the turnover order process.

The content of the related turnover order dataset is described in AS 5023.2. Material on dataset layout has been reproduced from AS 5023.2 to provide the relevant context.

STANDARDS AUSTRALIA

Australian Standard

Health supply chain messaging

Part 6: Dataset content—Turnover order status, rebate claim, rebate claim response

1 SCOPE

This Standard contains the dataset content for the following three transactions:

(a) Turnover order status

A transaction sent from a Wholesaler to a Manufacturer providing status information in relation to goods ordered in a turnover order previously placed on the Wholesaler by the Manufacturer on behalf of a Customer.

(b) Rebate claim

A transaction sent from a Wholesaler to a Manufacturer claiming a rebate in relation to goods sold to Customers at a discount set by the Manufacturer.

(c) Rebate claim response

A transaction sent from a Manufacturer to a Wholesaler confirming or adjusting a rebate claimed by the Wholesaler in a previously sent rebate claim.

Dataset content for the turnover order is described in AS 5023.2.

2 APPLICATION

This Standard has been written for health sector professionals involved in the use, implementation and assessment of health supply chain messaging.

The turnover order status and rebate claim transactions documented in this Standard have been developed in conjunction with Wholesalers and Manufacturers supplying the retail pharmacy sector. However the Standard is intended for application in all areas of the health industry supply chain that makes use of, or would like to make use of, similar functionality.

3 REFERENCED DOCUMENTS
