K

This Australian Standard was prepared by Committee IT/3, Computer Related Graphics. It was approved on behalf of the Council of Standards Australia on 16 December 1988 and published on 20 March 1989.

---

The following interests are represented on Committee IT/3:

**ACADS**

Association of Consulting Engineers, Australia

Australian Vice-Chancellors' Committee

Department of Defence

Royal Australian Institute of Architects

Telecom Australia

*Review of Australian Standards: To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up-to-date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

*Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.*

*Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.*

## PREFACE

This Standard was prepared by the Standards Australia Committee on Computer Related Graphics.

It is identical with and has been reproduced from ISO Standard 8651-3: 1988, *Information processing systems—Computer graphics—Graphical Kernel Systems (GKS) Language Bindings—Part 3: Ada*.

For the purpose of this Australian Standard the text of the ISO Standard should be modified as follows:

- (a) **Terminology:** The words 'Australian Standard' should replace the words 'International Standard' wherever they appear.
- (b) **References:** The references to International Standards should be replaced by references to Australian Standards as follows:

<i>Reference to International Standard</i>	<i>Australian Standard</i>
ISO	AS
7942 Information processing systems— Computer graphics—Graphical Kernel Systems (GKS) functional description	2880 Information processing systems— Computer graphics—Graphical Kernel Systems (GKS) functional description

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the Head Office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

# **Computer graphics—Graphical Kernel System (GKS) language bindings Part 3: Ada**

## **0 Introduction**

The Graphical Kernel System (GKS) (ISO 7942) is specified in a language independent manner and needs to be embedded in language dependent layers (language bindings) for use with particular programming languages.

The purpose of this part of ISO 8651 is to define a standard binding for the Ada computer programming language.
