

Babies' dummies

This Australian Standard® was prepared by Committee CS-040, Babies Dummies. It was approved on behalf of the Council of Standards Australia on 4 February 2015. This Standard was published on 24 March 2015.

The following are represented on Committee CS-040:

- Australian Breastfeeding Association
 - Australian Chamber of Commerce and Industry
 - Australian Competition and Consumer Commission
 - Australian Industry Group
 - Australian Toy Association
 - CHOICE
 - Consumer Affairs Victoria
 - Consumers Federation of Australia
 - Infant and Nursery Products Association of Australia
 - Office of Fair Trading, NSW
 - The Children's Hospital at Westmead
-

This Standard was issued in draft form for comment as DR AS 2432.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Technical Committee CS-040, Babies Dummies, to supersede AS 2432—2009. This Standard aims to establish, through manufacturing requirements, a desirable level of inherent safety in babies' dummies.

This edition differs from the previous edition in that—

- (a) material requirements have been added to align with EN 1400:2013;
- (b) requirements for decorations have been added;
- (c) the minimum width requirement for the dummy shield has been removed;
- (d) a minimum thickness requirement for the teat has been added;
- (e) the bite test has been adjusted to align with EN 1400:2013;
- (f) a requirement for a batch code has been added;
- (g) the warning label text has been adjusted;
- (h) conditioning requirements before testing have been adjusted;
- (i) the recommended instructions for use and care have been adjusted; and
- (j) a rationale has been added, based on EN 1400:2013.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is for information and guidance only.

STANDARDS AUSTRALIA

Australian Standard
Babies' dummies**1 SCOPE AND APPLICATION****1.1 Scope**

This Standard specifies safety requirements relating to the materials, design, construction, performance, packaging and product information for babies' dummies.

1.2 Application

This Standard applies to all babies' dummies except those intended for use by premature babies, or for therapeutic applications, in which the usage is under medical supervision or direction.

A dummy that is intended for use by premature babies, or for therapeutic applications is exempted from the requirements of this Standard. However, exempted dummies should comply with those requirements in this Standard that can be applied. Refer to the test methods in Appendix A.

2 REFERENCED DOCUMENTS

The following Standards are referred to in this Standard:

NOTE: Other documents referred to for further information by use of a number in square brackets (e.g. [3]) are listed in the Bibliography.
