

Australian Standard[®]

**GRAPHICAL SYMBOLS FOR
GENERAL ENGINEERING**

**Part 3 : WELDING AND NON-
DESTRUCTIVE EXAMINATION**

This Australian standard was prepared by Committee WD/1, Welding Definitions and Symbols. It was approved on behalf of the Council of the Standards Association of Australia on 12 November 1986 and published on 6 February 1987.

The following interests are represented on Committee WD/1:

Australian Welding Institute
Australian Welding Research Association
Bureau of Steel Manufacturers of Australia
Confederation of Australian Industry
CSIRO, Division of Manufacturing Technology
Department of Defence
Electricity Supply Association of Australia
Melbourne and Metropolitan Tramways Board
Metal Trades Industry Association of Australia
Railways of Australia Committee
Royal Melbourne Institute of Technology

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 85138.

PREFACE

This edition of this standard was prepared by the Association's Committee on Welding Definitions and Symbols, to supersede AS 1101, Graphical Symbols for General Engineering, Part 3—1979—Symbols for Welding. It is generally based on ANSI/AWS A2.4-79, Symbols for Welding and Nondestructive Testing, and the permission of the American Welding Society Inc. to use their standard is acknowledged.

The standard provides a scheme whereby complete details of welds and welded joints can be delineated on drawings. A separate section has been included establishing symbols for use on drawings to specify requirements for non-destructive examination for determining the soundness of materials.

The method for symbolic representation of welds on engineering drawings used in this standard is consistent with the 'third angle' method of projection, which is the preferred method given in [AS 1100, Technical Drawing, Part 101—General Principles](#). It should be noted, however, that the scheme is equally appropriate to drawings in which the 'first angle' method of projection is used.

The committee noted the practice currently adopted in ISO 2553, Welds—Symbolic Representation on Drawings, in regard to the position of the symbols on drawings, viz the dual reference line, and felt that this situation should not be carried over into this standard. Therefore, the practice of using one continuous reference line remains unaltered in this edition.

Illustrations used with the text are intended only to show how symbols may be used to convey welding or testing information and do not necessarily represent good or accepted design practice.

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

4.8 CONVENTION FOR BACK GOUGING AFTER WELDING ONE SIDE	44
SECTION 5. SYMBOLS FOR SURFACING	
5.1 GENERAL	48
5.2 USE OF SURFACING SYMBOL	48
5.3 SIZE (THICKNESS) OF SURFACES BUILT UP BY WELDING	48
5.4 EXTENT, LOCATION, AND ORIENTATION OF SURFACES BUILT UP BY WELDING	48
5.5 SURFACING A WELD FACE	48
SECTION 6. SYMBOLS FOR FLANGE WELDING	
6.1 GENERAL	50
6.2 EDGE-FLANGE WELDS	50
6.3 CORNER-FLANGE WELDS	50
6.4 DIMENSIONS OF FLANGE WELDS	50
6.5 MULTIPLE-JOINT FLANGE WELDS	50

SECTION 7. SYMBOLS FOR PLUG WELDING		
7.1	GENERAL	54
7.2	SIZE OF PLUG WELDS	54
7.3	ANGLE OF COUNTERSINK	54
7.4	DEPTH OF FILLING	54
7.5	SPACING OF PLUG WELDS	54
7.6	SURFACE CONTOUR OF PLUG WELDS	54
SECTION 8. SYMBOLS FOR SLOT WELDING		
8.1	GENERAL	57
8.2	DEPTH OF FILLING	57
8.3	DETAILS OF SLOT WELDS	57
8.4	SURFACE FINISH AND CONTOUR OF SLOT WELDS	59
SECTION 9. SYMBOLS FOR SPOT WELDING		
9.1	GENERAL	60
9.2	SIZE AND STRENGTH OF SPOT WELDS	60
9.3	SPACING OF SPOT WELDS	60
9.4	EXTENT OF SPOT WELDING	60
9.5	NUMBER OF SPOT WELDS	60
9.6	GROUPED SPOT WELDS	64
9.7	FLUSH SPOT WELDED JOINTS	64
9.8	MULTIPLE-JOINT SPOT WELDS	64
SECTION 10. SYMBOLS FOR SEAM WELDING		
10.1	GENERAL	65
10.2	SIZE AND STRENGTH OF SEAM WELDS	65
10.3	LENGTH OF SEAM WELDS	65
10.4	DIMENSIONING OF INTERMITTENT SEAM WELDS	65
10.5	ORIENTATION OF SEAM WELDS	65
10.6	FLUSH SEAM WELDED JOINTS	66
10.7	MULTIPLE-JOINT SEAM WELDS	66
SECTION 11. SYMBOLS FOR BRAZED JOINTS		
11.1	GENERAL	69
11.2	JOINT PREPARATION	69
SECTION 12. SYMBOLS FOR NON-DESTRUCTIVE EXAMINATION		
12.1	BASIC SYMBOLS	73
12.2	GENERAL PROVISIONS	73
12.3	METHODS OF SPECIFYING EXTENT OF NON-DESTRUCTIVE EXAMINATION	75
APPENDICES		
A	ABBREVIATIONS OF TERMS FOR WELDING AND APPLIED PROCESSES	77

GRAPHICAL SYMBOLS FOR GENERAL ENGINEERING

PART 3—WELDING AND NON-DESTRUCTIVE EXAMINATION

SECTION 1. SCOPE AND GENERAL

1.1 SCOPE. This standard describes symbols which provide the means of placing complete welding information on drawings. It covers the details and application of symbols related to various welding processes (including brazing), and non-destructive examination.

Appendix A gives a listing of abbreviations normally used for welding and allied processes. Appendix B shows the design of standard symbols, while Appendix C gives a typical example for the use of symbols on structural drawings.

1.2 REFERENCED DOCUMENTS. The following standards are referred to in this standard:

[AS 2536](#) Surface Texture

[AS 2812](#) Welding, Brazing and Cutting of Metals —
Glossary of Terms

1.3 DEFINITIONS. For the purpose of this standard, the definitions given in [AS 2812](#) shall apply.
