

Australian Standard™

**Plastics—Glass filament reinforced
plastics (GRP)—Methods of test**

Part 0: Introduction and list of methods

This Australian Standard was prepared by Committee PL-044, Reinforced Plastics Pipe Systems, Tanks and Vessels. It was approved on behalf of the Council of Standards Australia on 26 October 2001 and published on 8 February 2002.

The following interests are represented on Committee PL-044:

Australian Chamber of Commerce and Industry
Composites Association of New Zealand
Composites Institute of Australia
Institution of Engineers Australia
Master Plumber Australia
New Zealand Manufacturers' Federation
Plastics and Chemical Industries Association
Water Services Association of Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.
