

Australian Standard™

**Tubes (stainless steel) and tube fittings
for the food industry**

Part 4: Clamp liners with gaskets

S t a n d a r d s Australia

This Australian Standard was prepared by Committee FT-012, Dairy Factory Equipment. It was approved on behalf of the Council of Standards Australia on 30 December 2000 and published on 13 March 2001.

The following interests are represented on Committee FT-012:

Australian Chamber of Commerce and Industry
Australian Dairy Products Federation
Australian Stainless Steel Development Association
Dairy Food Safety, Victoria
Dairy Industry Association of Australia
Dairy Industry Authority of Western Australia
Dairy Process Engineering Centre
Safe Food Production, N.S.W
Queensland Dairy Authority

Additional interests participating in the preparation of this Standard:

Stainless Steel Tube Manufacturers

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 99458.

PREFACE

This Standard was prepared by the Standards Australia Committee FT-012, Dairy Factory Equipment, to supersede AS 1528.4—1976.

This is Part 4 of a series of Standards for tubes (stainless steel) and tube fittings for the food industry. The other Standards in the series are as follows:

AS

1528 Tubes (stainless steel) and tube fittings for the food industry

1528.1 Part 1: Tubes

1528.2 Part 2: Screwed couplings

1528.3 Part 3: Butt weld tube fittings

The objective of this revision is—

- (a) to include other welded-type clamp liner dimensions such as 12.7 mm, 19.1 mm, 152.4 mm and 203.2 mm;
- (b) to include additional gasket dimensions such as 12.7 mm, 19.1 mm, 152.4 mm and 203.2 mm; and
- (c) to delete appendices that are no longer required by the industry.

The term ‘normative’ has been used in this Standard to define the application of the appendix to which it applies. A ‘normative’ appendix is an integral part of a Standard.

STANDARDS AUSTRALIA

Australian Standard

Tubes (stainless steel) and tube fittings for the food industry

Part 4: Clamp liners with gaskets

1 SCOPE

This Standard applies to welded-type and expanded-type clamp liners and gaskets in tube couplings for effecting joins in pipelines in food processing plants. It specifies the materials, dimensions, and surface finish requirements.

This Standard excludes the operational requirements of the product.

A cross-section of clamp coupling assembly is given in Appendix A.

2 APPLICATION

Clamp liners in tube couplings for the food industry are intended to be used with stainless steel tubes specified in AS 1528.1.

3 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

AS

1528 Tubes (stainless steel) and tube fittings for the food industry

1528.1 Part 1: Tubes

1654 ISO system of limits and fits (series)

2074 Steel castings

ISO

4288 Geometrical Product Specifications (GPS)—Surface texture: Profile method—
Rules and procedures for the assessment of surface texture

4 DEFINITIONS

For the purposes of this Standard the following definitions apply:

4.1 Clamp

Ring-shaped tube coupling part with taper-sided channel section.

4.2 Clamp liner

Flanged tube coupling part, with one conical face to provide means for connecting mating liners.

4.3 Clamp tube coupling

Coupling with two liners intended for joining tube ends together by means of a clamp.

4.4 Expanded-type clamp liner

Clamp liner to be attached to a tube end by expanding.
