### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at [www.standards.com.au](http://www.standards.com.au) and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at [mail@standards.org.au](mailto:mail@standards.org.au), or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

**RECONFIRMATION NOTICE**

Technical Committee ME-005 has reviewed the content of this publication and in accordance with Standards Australia procedures for reconfirmation, it has been determined that the publication is still valid and does not require change.

Certain documents referenced in the publication may have been amended since the original date of publication. Users are advised to ensure that they are using the latest versions of such documents as appropriate, unless advised otherwise in this Reconfirmation Notice.

Approved for reconfirmation in accordance with Standards Australia procedures for reconfirmation on 26 April 2018.

The following are represented on Technical Committee ME-005:

Australian Chamber of Commerce and Industry

Australian Industry Group

Australian Institute for Non-Destructive Testing

Bureau of Steel Manufacturers of Australia

Crane Association of New Zealand

Crane Industry Council of Australia

Department of Justice and Attorney General (QLD)

Elevating Work Platform Association of Australia

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee ME-005, Cranes, to supersede AS 1418.6—1988.

The 1988 edition was reviewed by the Committee, and it was found to be technically valid. Hence, this edition does not include technical alterations to the 1988 edition; however, the referenced documents have been updated, and editorial changes have been made to align with current Standards Australia policy.

This Standard covers specific requirements for guided storing and retrieving appliances and is intended for use in conjunction with AS 1418.1, *Cranes, hoists and winches, Part 1: General requirements*; however, requirements given herein take precedence over corresponding requirements of that Standard. Because of the complexity of the range of this family of equipment this Standard is at present restricted to the types designated as shown in Appendix A.

Where a total storing and retrieving system of appliances and racking is established and a variation to any element of the system, including the appliance(s), is required, a complete review of the total storing and retrieving system is to be made to ensure that it complies with all the requirements of this Standard. It should be noted that there are a number of racking systems, namely—

- (a) appliances with freestanding racking;
- (b) appliances with rack-clad buildings or shelf-clad buildings;
- (c) appliances with freestanding shelving; and
- (d) appliances with mobile racking.

All these systems are subject to regulations applied in accordance with Machinery Acts, Shop and Factory Acts, and with Local Government Acts relating to fire protection.

The term 'informative' has been used in this Standard to define the application of the appendix to which it applies. An informative appendix is only for information and guidance.

Part 6: Guided storing and retrieving appliances

---

SECTION 1 SCOPE AND GENERAL

### 1.1 SCOPE

This Standard sets out requirements for guided storing and retrieving appliances of the storage and retrieval machine and universal stacker crane types as defined in AS 2549, for appliances intended to carry out similar functions, and for the interface between the elements of the total system, e.g., racking and the appliances. It does not apply to narrow aisle storage and retrieval machines of the top support bottom guided type, storage and retrieval trucks and industrial trucks complying with AS 2359, and gravity flow systems.

NOTES:

- 1 A chart showing types of guided storing and retrieving appliances within the scope of this Standard is given in Appendix A.
- 2 A guided storing and retrieving appliance may be referred to herein as ‘(an) (the) appliance’.

### 1.2 APPLICATION

Guided storing and retrieving appliances shall comply with the appropriate sections of this Standard.

This Standard is complementary to AS 1418.1, but the requirements given herein take precedence over corresponding requirements in that Standard.

### 1.3 REFERENCED DOCUMENTS

The documents below are referred to in this Standard.

AS

1359	Rotating electrical machines—General requirements (all parts)
1360	Rotating electrical machines of particular types or for particular applications
1418	Cranes hoists and winches
1418.1	Part 1: General requirements
1418.2	Part 2: Cranes (including hoists and winches)—Serial hoists and winches
1418.3	Part 3: Bridge and gantry cranes
1532	Short pitch transmission precision roller chains and chain wheels
1657	Fixed platforms, walkways, stairways and ladders—Design, construction and installation
1663	Method for dropweight test nil-ductility transition temperature of ferritic steels
2152	Rivetless chain, trolleys and trolley attachments
2359	Powered industrial trucks (all parts)
2549	Cranes (including hoists and winches)—Glossary of terms
2752	Preferred numbers and their use
2759	Steel wire rope—Application guide
