

## Australian Standard™

AS 2219.3.2

**Methods of test for vitreous enamel coatings****Method 3.2: Miscellaneous tests—Production of specimens for testing**

## PREFACE

This Standard was prepared by the Standards Australia Committee CH-007, Vitreous Enamel Finishes.

This Standard is identical with and has been reproduced from ISO 13804:1999, *Vitreous and porcelain enamels for aluminium—Production of specimens for testing*.

This Standard is Part 3.2 of a series of Standards covering the miscellaneous testings of vitreous enamel coatings.

The series comprises the following Parts:

AS

2219 Methods of test vitreous enamel coatings

2219.3.1 Method 3.1: Miscellaneous tests—Method of test of self-cleaning properties

2219.3.2 Method 3.2: Miscellaneous tests—Production of specimens for testing

2219.3.3 Method 3.3: Miscellaneous tests—Determination of adhesion of enamels on aluminium under the action of electrolytic solution (spall test)

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title pages.
- (b) In the source text, 'this International Standard' should read 'this Australian Standard.'
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to equivalent Australian Standards as follows:

<i>Reference International Standard</i>		<i>Australian Standard</i>
