

Australian/New Zealand Standard™

Occupational protective footwear

Part 9: Additional specifications for occupational footwear

[ISO title: Safety, protective and occupational footwear for professional use,
Part 8: Additional specifications for occupational footwear]

Standards Australia

STANDARDS
NEW ZEALAND
Pūrongo Aotearoa

AS/NZS 2210.9:2001

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee SF-003, Occupational Protective Footwear. It was approved on behalf of the Council of Standards Australia on 16 February 2001 and on behalf of the Council of Standards New Zealand on 16 February 2001. It was published on 5 May 2001.

The following interests are represented on Committee SF-003:

Association of Certification Bodies
Australian Podiatry Council
Australasian Fire Authorities Council
Bureau of Steel Manufacturers of Australia
Department of Defence, Australia
Department of Labour, New Zealand
Footwear Manufacturers Association of Australia
Melbourne Water
New Zealand Footwear Industry Association
New Zealand Leather and Shoe Research Association
Plastics and Chemical Industry Association
SATRA Technology Centre
TAFE N.S.W.
Testing Interests (Australia)
The Royal Australian Chemical Institute
United Firefighters Union of Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

Australian/New Zealand Standard™

Occupational protective footwear

Part 9: Additional specifications for occupational footwear

Originated as part of AS Z2—1952 and AS Z3—1952.
Previous edition AS/NZS 2210.2:1994.
Jointly revised and redesignated in part as AS/NZS 2210.9:2001.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee SF-003, Occupational Protective Footwear to supersede (in part) AS/NZS 2210.2:1994, *Occupational protective footwear, Part 2: Specification*.

The objective of this Standard is to provide manufacturers with requirements for footwear intended for use in workplace applications.

This Standard is identical with and has been reproduced from ISO 8782-8:2000—*Safety, protective and occupational footwear for professional use, Part 8: Additional specifications for occupational footwear*.

This Standard extends the scope of AS/NZS 2210.5:2000, *Occupational protective footwear, Part 5: Specification for occupational footwear* by specifying further properties which may be needed in occupational protective footwear. It refers to AS/NZS 2210.5 (ISO 8782-4) for basic requirements which are mandatory for all items of occupational footwear and, if desired permits other combinations of properties to be specified by the selection of appropriate optional requirements from Table 3 of AS/NZS 2210.3.

As this Standard is reproduced from an International Standard, the following applies.

- (a) Its number appears on the cover and title page while the International Standard number appears only on the cover.
- (b) In the source text, ‘this part of ISO 8782’ should read ‘this Australian/New Zealand Standard’.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to international Standards should be replaced by equivalent Australian, New Zealand or Australian/New Zealand Standards, as follows:

<i>Reference to International Standards</i>		<i>Australian or Joint Australian/New Zealand Standard</i>	
ISO		AS/NZS	
8782	Safety, protective and occupational footwear for professional use	2210	Occupational protective footwear
8782-1	Part 1: Requirements and test methods	2210.2	Part 2: Requirements and test methods
8782-4	Part 4: Specification for occupational footwear	2210.5	Part 5: Specification for occupational footwear
8782-5	Part 5: Additional requirements and test methods	2210.6	Part 6: Additional requirements and test methods

Manufacturers have a grace period of two years from the date of publication AS/NZS 2210.5 to comply with the requirements of this Standard.

Guidance for the selection, care and use of protective footwear is not covered by this Standard but is provided in AS/NZS 2210.1:1994, *Occupational protective footwear, Part 1: Guide to selection, care and use*.

NOTES

AUSTRALIAN/NEW ZEALAND STANDARD

Occupational protective footwear

Part 9: Additional specifications for occupational footwear

1 Scope

This part of ISO 8782 specifies, by reference to ISO 8782-1 and ISO 8782-5 additional requirements for occupational footwear, relating to water resistance.

Basic and further optional requirements for occupational footwear are given in ISO 8782-4.

2 Normative references

The following normative documents contain provisions which, through reference in this text, constitute provisions of this part of ISO 8782. For dated references, subsequent amendments to, or revisions of, any of these publications do not apply. However, parties to agreements based on this part of ISO 8782 are encouraged to investigate the possibility of applying the most recent editions of the normative documents indicated below. For undated references, the latest edition of the normative document referred to applies. Members of ISO and IEC maintain registers of currently valid International Standards.

ISO 8782-1:1998, *Safety, protective and occupational footwear for professional use — Part 1: Requirements and test methods.*

ISO 8782-4:1998, *Safety, protective and occupational footwear for professional use — Part 4: Specification for occupational footwear.*

ISO 8782-5:1999, *Safety, protective and occupational footwear for professional use — Part 5: Additional requirements and test methods.*

3 Terms and definitions

For the purposes of this part of ISO 8782, the terms and definitions given in ISO 8782-1 and ISO 8782-4 apply.

4 Classification

Footwear shall be classified in accordance with Table 1 of ISO 8782-4:1998.
