

Australian Standard[®]

**INSTALLATION OF FIRE HOSE
REELS**

This Australian Standard was prepared by Committee FP/7, Fire Hose Reels. It was approved on behalf of the Council of the Standards Association of Australia on 12 July 1988 and published on 12 September 1988.

The following interests are represented on Committee FP/7:

Australian Uniform Building Regulations Co-ordinating Council
Board of Fire Commissioners, New South Wales
Building Owners and Managers Association of Australia
Commonwealth Fire Board
Confederation of Australian Industry
Country Fire Authority, Victoria
Department of Housing and Construction
Fire Protection Industry Association of Australia
Insurance Council of Australia
Plastics Institute of Australia
Telecom Australia
Western Australian Fire Brigades Board

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 86097.

PREFACE

This Standard was prepared by the Association's Committee on Fire Hose Reels to supersede AS 2441-1983.

This edition includes changes as follows:

- (a) Clause 9.1—provides a new requirement for the protection of fire hose reels in external situations.
- (b) Clause 9.2.1—permits the marking on a cabinet to be on a contrasting background.
- (c) Clause 10—expands mounting requirements for the stop valve.
- (d) Clause 11—clarifies the commissioning procedure.

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
