

Australian Standard™

**Methods of testing plastics and
composite materials for use in sanitary
plumbing fixtures**

Part 0: Introduction and list of methods

This Australian Standard was prepared by Committee WS-003, Sanitary Plumbing Fixtures. It was approved on behalf of the Council of Standards Australia on 12 January 2006.
This Standard was published on 3 February 2006.

The following are represented on Committee WS-003:

Australian Chamber of Commerce and Industry
Australian Industry Group
Brisbane Water
Certification Interests, Australia
Local Government, New Zealand
Testing Interests (Australia)
Water Corporation, Western Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia, GPO Box 476, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 05548.

PREFACE

This Standard was prepared by Standards Australia Committee WS-003, Sanitary Plumbing Fixtures, to supersede AS 3558.0—1989, *Methods of testing plastics and composite materials sanitary plumbing fixtures—Introduction and list of methods* on publication.

The objective of this Standard is to provide designers, manufacturers and test laboratories with an index to test procedures available for use with plastic and composite materials used in sanitary plumbing fixtures. These test methods are based on engineering judgement and are designed to provide information on specific properties of plastics and composite materials.

The major change to the 1989 edition is that the Standard has been reformatted to the current Standards Australia style.
