

Australian/New Zealand Standard™

**Generic Electronic Document
Interchange**

AS/NZS ISO 17933:2004

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee IT-019, Computer Applications—Information and Documentation. It was approved on behalf of the Council of Standards Australia on 14 May 2004 and on behalf of the Council of Standards New Zealand on 21 May 2004. It was published on 12 July 2004.

The following are represented on Committee IT-019:

Australian Council of Libraries and Information Services
Australian Library and Information Association
Australian Publishers Association
Committee of New Zealand University Librarians
Council of Australian State Libraries
Council of Australian University Librarians
CSIRO Information Technology Services
Library and Information Association of NZ Aotearoa/Te Rau Herenga o Aotearoa
National Archives New Zealand
National Gallery of Australia
National Library of Australia
National Library of New Zealand
Tertiary Library Networks
Victoria University of Wellington NZ
Victorian Association for Library Automation

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT-019, Computer Applications—Information and Documentation.

This Standard is identical with, and has been reproduced from ISO 17933:2000, *GEDI—Generic Electronic Document Interchange*.

The objective of this Standard is to specify a format for exchange of electronic document copies between computer systems. The format includes a definition of a GEDI header containing information about the request, supplier and format of the document and relevant bibliographic information.

The term ‘informative’ has been used in this Standard to define the application of the annex to which it applies. An ‘informative’ annex is only for information and guidance.

As this Standard is reproduced from an international standard, the following apply:

- (a) Its number appears on the cover and title page while the international standard number appears only on the cover.
- (b) In the source text ‘this International Standard’ should read ‘this Australian/New Zealand Standard’.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

AUSTRALIAN/NEW ZEALAND STANDARD

GEDI — Generic Electronic Document Interchange

1 Scope

This International Standard specifies a format for exchange of electronic document copies between computer systems. The format includes the definition of a GEDI Header containing information about the requester, Supplier, and format of the document and relevant bibliographic information.

This International Standard is applicable to computer systems supporting Interlibrary Loan and Document Transmission applications.

2 Normative references

The following normative documents contain provisions which, through reference in this text, constitute provisions of this International Standard. For dated references, subsequent amendments to, or revisions of, any of these publications do not apply. However, parties to agreements based on this International Standard are encouraged to investigate the possibility of applying the most recent editions of the normative documents indicated below. For undated references, the latest edition of the normative document referred to applies. Members of ISO and IEC maintain registers of currently valid International Standards.

ISO 2108:1992, *Information and documentation — International standard book numbering (ISBN)*.

ISO 3166-1:1997, *Codes for the representation of names of countries and their subdivisions — Part 1: Country codes*.

ISO 3297:1998, *Information and documentation — International standard serial number (ISSN)*.

ISO 8601:1988, *Data elements and interchange formats — Information interchange — Representation of dates and times*.

ISO 10161-1:1997, *Information and documentation — Open Systems Interconnection — Interlibrary Loan Application Protocol Specification — Part 1: Protocol specification*.

ISO 10161-2:1997, *Information and documentation — Open Systems Interconnection — Interlibrary Loan Application Protocol Specification — Part 2: Protocol implementation conformance statement (PICS) proforma*.

RFC 959, *File Transfer Protocol (FTP)*, October 1985.

3 Terms and definitions

For the purposes of this International Standard, the following terms and definitions apply.

3.1

consumer

application process that receives the GEDI record, processes the GEDI Header information, and makes one Electronic Document Copy available to the end user
