

Australian Standard™

Geotextiles—Methods of test

**Part 0: General introduction and list of
methods**

This Australian Standard was prepared by Committee CE-020, Geosynthetics. It was approved on behalf of the Council of Standards Australia on 6 June 2003 and published on 3 October 2003.

The following are represented on Committee CE-020:

AUSTROADS
AWTA Textile Testing
Australian Geomechanics Society
Australian Industry Group
Australian Water and Wastewater Association
CSIRO Textile and Fibre Technology
Civil Contractors Federation
Commerce Queensland
International Geosynthetics Society
Main Roads Department, Queensland
Royal Australian Chemical Institute
SunWater
Technical Textile and Nonwoven Association

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 02243.
