

Australian/New Zealand Standard™

## Hexagon flange head tapping screws

## **AS/NZS 4410:2015**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee ME-029, Fasteners. It was approved on behalf of the Council of Standards Australia on 28 September 2015 and on behalf of the Council of Standards New Zealand on 29 September 2015.  
This Standard was published on 9 November 2015.

The following are represented on Committee ME-029:

Association of Accredited Certification Bodies  
Association of Wall and Ceiling Industries of Australia and New Zealand  
Australasian Corrosion Association  
Australian Chamber of Commerce and Industry  
Australian Engineered Fasteners and Anchors Council  
Australian Industry Group  
Australian Steel Institute  
Austroads  
Bureau of Steel Manufacturers of Australia  
CSIRO  
Galvanizers Association of Australia  
Materials Australia  
National Association of Steel-Framed Housing  
National Association of Testing Authorities Australia  
New Zealand Heavy Engineering Research Association  
Society of Automotive Engineers Australasia  
Steel Construction New Zealand  
Swinburne University of Technology

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.saiglobal.com.au](http://www.saiglobal.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

---

*This Standard was issued in draft form for comment as DR AS/NZS 4410:2015.*

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee ME-029, Fasteners, to supersede AS/NZS 4410:1996.

The objective of this Standard is to provide the dimensions and mechanical properties of a standard range of hexagon flange head tapping screws.

The objective of the revision is to adopt the current edition of ISO 10509.

This Standard is identical with, and has been reproduced from ISO 10509:2012, *Hexagon flange head tapping screws*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) In the source text ‘this International Standard’ should read ‘this Australian/New Zealand Standard’.
- (b) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>	<i>Australian or Australian/New Zealand Standard</i>
ISO	AS
4759 Tolerances for fasteners	5066 Tolerances for ISO metric bolts, screws, studs and nuts—Product grades A, B and C
4759-1 Part 1: Bolts, screws, studs and nuts—Product grades A, B and C	

Only normative references that have been adopted as Australian or Australian/New Zealand Standards have been listed.

The term ‘normative’ has been used in this Standard to define the application of the annex to which it applies. A ‘normative’ annex is an integral part of a Standard.

## AUSTRALIAN/NEW ZEALAND STANDARD

**Hexagon flange head tapping screws****1 Scope**

This International Standard specifies hexagon flange head tapping screws with threads from ST2,2 up to and including ST9,5.

**2 Normative references**

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 225, *Fasteners — Bolts, screws, studs and nuts — Symbols and descriptions of dimensions*

ISO 1478, *Tapping screws thread*

ISO 2702, *Heat-treated steel tapping screws — Mechanical properties*

ISO 3269, *Fasteners — Acceptance inspection*

ISO 3506-4, *Mechanical properties of corrosion-resistant stainless steel fasteners — Part 4: Tapping screws*

ISO 4042, *Fasteners — Electroplated coatings*

ISO 4759-1, *Tolerances for fasteners — Part 1: Bolts, screws, studs and nuts — Product grades A, B and C*

ISO 8992, *Fasteners — General requirements for bolts, screws, studs and nuts*

ISO 10683, *Fasteners — Non-electrolytically applied zinc flake coatings*

ISO 16048, *Passivation of corrosion-resistant stainless-steel fasteners*

**3 Dimensions**

For the dimensions, see Figure 1 and Table 1.

Symbols and descriptions of dimensions are specified in ISO 225.
