**WELDING, BRAZING AND  
CUTTING OF METALS—  
GLOSSARY OF TERMS**

---

This Australian standard was prepared by Committee WD/1, Welding Definitions and Symbols. It was approved on behalf of the Council of the Standards Association of Australia on 18 June 1985 and published on 2 December 1985.

---

The following interests are represented on Committee WD/1:

Australian Welding Institute  
Australian Welding Research Association  
Bureau of Steel Manufacturers of Australia  
Confederation of Australian Industry  
CSIRO, Division of Manufacturing Technology  
Department of Defence  
Department of Employment and Industrial Affairs, Vic.  
Electricity Supply Association of Australia  
Melbourne and Metropolitan Tramways Board  
Metal Trades Industry Association of Australia  
Railways of Australia Committee  
Royal Melbourne Institute of Technology

---

**Review of Australian Standards.** *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

*Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.*

*Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.*

---

*This Standard was issued in draft form for comment as DR 83249.*

## PREFACE

This standard was prepared by the Association's Committee on Welding Definitions and Symbols. It supersedes AS Z5, Glossary of Metal Welding Terms and Definitions, Part 1—1968—General Terms for Welding, Brazing and Cutting. It provides definitions of terms used in connection with welding, brazing, and cutting of metals. Process abbreviations which are commonly used in industry, e.g. MMAW, are included.

The standard is intended to serve as a basis for securing uniformity in terminology in the welding industry, standards, and welding education throughout Australia.

Major technical changes which have been introduced in this standard include the addition of several new terms particularly in relation to health and safety, and to new processes such as 'laser-beam welding'.

Terms and definitions relating to processes in general have been grouped in a separate section. These terms are repeated in other sections, as appropriate.

The layout of the previous edition has been retained so that terms relating to various processes are listed and defined in individual sections. However, the terms in each section have been arranged in a purely alphabetical sequence.

Figures illustrating more than one term or repeated terms have been grouped in an appendix. This arrangement was made to facilitate reference to these figures. Figures showing derivation of various processes are included.

In some cases, more than one term is listed. The first term (printed in bold type) should be regarded as the preferred term.

An alphabetical index of all defined terms completes the standard.

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

## CONTENTS

	<i>Page</i>
SECTION 1. DEFINITIONS OF PROCESSES . . . . .	4
SECTION 2. GENERAL TERMS RELATING TO WELDING . . . . .	12
SECTION 3. TERMS RELATING TO FUSION WELDING (WELDING WITHOUT PRESSURE)	
3.1 General Terms Relating to Fusion Welding . . . . .	16
3.2 Terms Relating to Arc Welding . . . . .	25
3.3 Terms Relating to Gas Welding . . . . .	32
3.4 Terms Relating to Electron-beam and Laser-beam Welding . . . . .	33
3.5 Terms Relating to Electroslag and Electrogas Welding . . . . .	36
3.6 Terms Relating to Aluminothermic Welding . . . . .	36
SECTION 4. TERMS RELATING TO WELDING WITH PRESSURE	
4.1 General Terms Relating to Welding With Pressure . . . . .	37
4.2 Terms Relating to Resistance Welding . . . . .	38
4.3 Terms Relating to Forge Welding . . . . .	48
4.4 Terms Relating to Pressure Welding . . . . .	49
4.5 Terms Relating to Stud Welding . . . . .	49
4.6 Terms Relating to Ultrasonic Welding . . . . .	50
4.7 Terms Relating to Friction Welding . . . . .	50
4.8 Terms Relating to Diffusion Welding . . . . .	50
4.9 Terms Relating to Explosive Welding . . . . .	50
SECTION 5. TERMS RELATING TO BRAZE WELDING, BRAZING AND SOLDERING	
5.1 General Terms Relating to Braze Welding, Brazing and Soldering . . . . .	52
5.2 Terms Relating to Braze Welding and Brazing . . . . .	52
5.3 Terms Relating to Soldering . . . . .	53
SECTION 6. TERMS RELATING TO THERMAL SPRAYING . . . . .	54
SECTION 7. TERMS RELATING TO THERMAL CUTTING	
7.1 General Terms Relating to Thermal Cutting . . . . .	55
7.2 Terms Relating to Oxygen Cutting . . . . .	55
7.3 Terms Relating to Plasma Cutting . . . . .	57
7.4 Terms Relating to Arc Cutting . . . . .	57
7.5 Terms Relating to Spark-erosion Cutting . . . . .	57
7.6 Terms Relating to Electron-beam and Laser-beam Cutting . . . . .	57
SECTION 8. TERMS RELATING TO WELD IMPERFECTIONS . . . . .	59
SECTION 9. TERMS RELATING TO DESTRUCTIVE TESTING . . . . .	70
SECTION 10. TERMS RELATING TO HEALTH AND SAFETY . . . . .	75
APPENDIX A. GENERAL ILLUSTRATIONS . . . . .	77
INDEX . . . . .	95

**WELDING, BRAZING AND CUTTING OF METALS—GLOSSARY OF TERMS**

---

SECTION 1. DEFINITIONS OF PROCESSES

No	Term	Definition
1.001	<b>air-arc cutting</b>	Thermal cutting using an arc for melting the metal and a stream of air to remove the molten metal to enable a cut to be made.
1.002	<b>air-arc gouging</b>	The formation of a groove by means of air-arc cutting.
1.003	<b>aluminothermic welding</b>	A welding process in which an aluminothermic reaction takes place within a crucible and the resultant molten metal and aluminium oxide slag flows into a weld joint contained by a mould (see Fig. 1.1).

Fig. 1.1. ALUMINOTHERMIC WELDING

1.004	<b>arc braze welding</b>	A braze welding process in which the heat required is obtained from an electric arc.
1.005	<b>arc cutting</b>	Thermal cutting using heat of an arc between an electrode, which may or may not be metallic, and the base metal.
1.006	<b>arc-image welding</b>	Radiation welding where an optical system is used for focusing the emitted radiation from a high temperature source, such as a high pressure plasma arc, on to the work.
1.007	<b>arc spot welding</b>	Arc welding in which overlapping parts are joined by fusing through one component into the other and so producing a fusion spot weld at the faying surfaces.
1.008	<b>arc spraying</b>	Thermal spraying using, as a heat source, an electric arc between two consumable electrodes of a coating material, and a compressed gas which is used to atomize and propel the material to the substrate.
1.009	<b>arc stud welding</b>	Stud welding wherein the heat for the process is obtained from an arc between the stud base and the workpiece. The weld may be protected either by a ferrule, flux or gas shielding. The process is usually controlled automatically.
1.010	<b>arc welding</b>	Fusion welding in which heat for welding is obtained from an electric arc or arcs.
1.011	<b>atomic-hydrogen welding</b>	Arc welding in which molecular hydrogen, passing through an arc between two tungsten or other suitable electrodes, is changed to its atomic form and then recombines to supply the heat for welding or brazing.
