

Australian/New Zealand Standard™

**Hand-held motor-operated electric
tools—Safety**

**Part 1: General requirements
(IEC 60745-1:2001, MOD)**

AS/NZS 60745.1:2003

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-002, Safety of Household and Similar Electrical Appliances and Small Power Transformers. It was approved on behalf of the Council of Standards Australia on 8 October 2002 and on behalf of the Council of Standards New Zealand on 2 October 2002.

This Standard was published on 24 January 2003.

The following are represented on Committee EL-002:

Association of Certification Bodies
Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Canterbury Manufacturers Association New Zealand
Consumer Electronic Suppliers Association, Australia
Electrical regulatory authorities, Australia
Electrical test laboratories
Electrical consultants
Electricity Supply Association of Australia
Institution of Engineers Australia
Metal Trades Industries Association of Australia
Ministry of Consumer Affairs, New Zealand

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 01943.

Australian/New Zealand Standard™

Hand-held motor-operated electric tools—Safety

Part 1: General requirements (IEC 60745-1:2001, MOD)

Originated in Australia as AS C160-1959. Previous edition AS/NZS 3160:1996. Revised and redesignated, in part, as AS/NZS 7450.1:1999.
Revised and redesignated as AS/NZS 60745.1:2003.
Reissued incorporating Amendment No. 1 (November 2003).
Reissued incorporating Amendment No. 2 (May 2004).
Reissued incorporating Amendment No. 3 (November 2007).

AUSTRALIA/NEW ZEALAND STANDARD

Hand-held motor-operated electric tools – Safety –

Part 1: General requirements

FOREWORD

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-002 - Safety of Household and Similar Electrical Appliances and Small Power Transformers. It will supersede AS/NZS 7450.1:1999 and its amendments on publication.

A3 | This standard incorporates Amendment No. 1 (November 2003), Amendment No. 2 (May 2004) and Amendment No. 3 (November 2007). The changes introduced by the Amendments are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected. Where an application date other than immediate is applicable to an amendment the date of application (DOA) is indicated by the marginal bar against the part affected.

The objective of this Standard is to provide manufacturers, designers, regulatory authorities, testing laboratories and similar organizations with safety requirements designed to give the user protection against hazards that might occur during normal operation and abnormal operation of the appliance and which may be used as the basis for approval for sale or for connection to the electricity supply mains in Australia and New Zealand

This Standard is an adoption with national modifications and contains the full text of the third edition of IEC 60745.1:2001, Hand-held motor-operated electric tools – Safety – Part 1: General requirements, including its corrigendum 1 (2003–08), its amendment 1 (2002-08), corrigendum 1 to amendment 1 (2003-01) and amendment 2 (2003-06) and has been varied as indicated to take account of Australian and New Zealand conditions.

This part is to be used in conjunction with the appropriate Part 2 of AS/NZS 60745. The Parts 2 contain clauses to supplement or modify the corresponding clauses in this part to provide the relevant requirements for each type of appliance.

NOTE 1 The following print types are used:

- requirements: in roman type;
- *test specifications: in italic type;*
- notes: in small roman type.

Annexes A, B, C, D, E, F, G, I, K and L form an integral part of this standard.

NOTE In annexes B, K and L, subclauses which are additional to those in the main body of the text are numbered starting from 101.

The numbering of clauses, subclauses, notes, tables, figures and annexes follows that of IEC 60745-1:2001. To allow for the introduction of additional material by the IEC, the numbers 101 to 200 have been reserved. To allow for additional material to be introduced by Australia and New Zealand, the numbers 201 to 300 are used to number further clauses, subclauses, notes, tables and figures in part 1. Additional annexes are lettered ZA, ZB and so on.

This scheme has been introduced to reduce the likelihood of the IEC and Australia and New Zealand using the same identifier for different purposes.

The use of the word VOID indicates that the IEC text is not used in Australia or New Zealand. The use of this word also avoids the need to renumber, clauses, notes, tables and figure if an earlier clause, note, table or figure is not used.

Clause 2 has been reformatted to indicate the Australia/New Zealand standard that is equivalent to the IEC standard or ISO standard to which normative reference is made.

The bibliography has been reformatted to indicate the Australia/New Zealand standard that is equivalent to the IEC standard or ISO standard to which an informative reference is made.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown on the cover and title page only.
- (b) In the source text "this International Standard" should read "this Australian/New Zealand Standard".
- (c) A full point substitutes for a comma when referring to a decimal marker.

Variations to IEC 60745-1:2001 are indicated at the appropriate places throughout this standard. Strikethrough (~~example~~) identifies IEC tables, figures and passages of text which, for the purposes of this Australian/New Zealand standard are deleted. Where Australian/New Zealand tables, figures or passages of text are added, each is set in its proper place and identified by shading (~~example~~). Added figures are not themselves shaded, but are identified by a shaded border.

Variations made to IEC 60745-1:2001 form the Australian variations for the purposes of the IECEE scheme for recognition of testing to standards for safety of electrical equipment (the CB scheme). These variations have been incorporated in the body of the standard. They are listed in Annex ZZ for easy reference.

INTRODUCTION

It has been assumed in the drafting of this Standard that the execution of its provisions is entrusted to appropriately qualified and experienced people.

The requirements in this Standard maybe applied, so far as is reasonable, to tools not mentioned in part 2, and to tools designed on new principles.

If the functions of a tool are covered by the different parts 2 of IEC 60745, the relevant part 2 is applied to each function separately, so far as is reasonable. If applicable, the influence of one function on the other is taken into account.

A product employing materials or having forms of construction differing from those detailed in the requirements of this standard may be examined and tested according to the intention of the requirements and, if found to be substantially equivalent, may be judged to comply with the standard.

The essential safety requirements in AS/NZS 3820 that could be applicable to hand-held motor operated electric tools are covered by this standard

NOTE Standards dealing with non-safety aspects of hand-held motor-operated electric tools are

- IEC standards published by TC 59 concerning methods of measuring performance;
- CISPR 14-1, IEC 61000-3-2 and IEC 61000-3-3 concerning electromagnetic emissions;
- CISPR 14-2 concerning electromagnetic immunity.

HAND-HELD MOTOR-OPERATED ELECTRIC TOOLS – SAFETY –

Part 1: General requirements

1 Scope

1.1 This International Standard deals with the safety of hand-held motor-operated or magnetically driven electric **tools**, the **rated voltage** of the **tools** being not more than 250 V for single-phase a.c. or d.c. **tools**, and 440 V for three-phase a.c. **tools**.

A2

So far as is practicable, this standard deals with the common hazards presented by **hand-held tools** which are encountered by all persons in the normal use and reasonably foreseeable misuse of the **tools**.

Tools with an electric heating element are within the scope of this standard. They should also comply with relevant parts of IEC 60335.

Hand-held electric **tools**, hereinafter referred to as **tools**, which can be mounted on a support for use as fixed **tools** without any alteration of the **tool** itself, are within the scope of this standard. Unless the requirement for such support is given in a relevant part 2, this standard alone will not be sufficient to ensure that the combination of **tool** and support is adequate.

A1

Requirements for motors not isolated from the supply, and having **basic insulation** not designed for the **rated voltage** of the **tools**, are given in Annex B. Requirements for rechargeable battery-powered motor-operated or magnetically driven **tools** and the battery packs for such **tools** are given in Annex K. Those for such **tools** that are also operated and/or charged directly from the mains or a non-isolated source are given in Annex L.

This standard does not apply to:

- **hand-held tools** intended to be used in the presence of explosive atmosphere (dust, vapour or gas);
- **hand-held tools** used for preparing and processing food;
- **hand-held tools** for medical purposes (IEC 60601);
- heating **tools** which are covered by IEC 60335-2-45.

~~For **hand-held tools** intended to be used in vehicles or on board ships or aircraft, additional requirements may be necessary.~~

NOTE Attention is drawn to the fact that in many countries, additional requirements are specified by the national health authorities, the national authorities responsible for the protection of labour, the national water supply authorities, etc.

2 Normative references

The following normative documents contain provisions which, through reference in this text, constitute provisions of this part of IEC 60745. For dated references, subsequent amendments to, or revisions of, any of these publications do not apply. However, parties to agreements based on this part of IEC 60745 are encouraged to investigate the possibility of applying the most recent editions of the normative documents indicated below. For undated references, the latest edition of the normative document referred to applies. Members of IEC and ISO maintain registers of currently valid International Standards.
