

AS 1668.2 Supplement 1—2002

**The use of ventilation and
airconditioning in buildings—
Ventilation design for indoor air
contaminant control**

(Supplement 1 to AS 1668.2—2002)

This Australian Standard supplement was prepared by Committee ME-062, Ventilation and Airconditioning. It was approved on behalf of the Council of Standards Australia on 29 April 2002 and published on 10 June 2002.

The following are represented on Committee ME-062:

Air Conditioning and Mechanical Contractors Association of Australia
Air Conditioning and Refrigeration Equipment Manufacturers Association of Australia
Australasian Fire Authorities Council
Australian Building Codes Board
Australian Institute of Building Surveyors
Australian Institute of Environmental Health
Australian Institute of Refrigeration, Air Conditioning and Heating
Chartered Institution of Building Services Engineers
Department of Contract and Management Services W.A.
FPA Australia
Institution of Refrigeration, Heating and Airconditioning Engineers New Zealand
Insurance Council of Australia
Metal Trades Industry Association of Australia
Plastics and Chemical Industries Association
Property Council of Australia
Thermal Insulation Contractors Association of Australia
National Environmental Health Forum

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 96425(in part).

AS 1668.2 Supplement 1—2002

The use of ventilation and airconditioning in buildings—Ventilation design for indoor air contaminant control

(Supplement 1 to AS 1668.2—2002)

Originated as MP47.C2—1980.
Previous edition AS 1665.2 Supplement 1—1999.
Second edition 2002.

PREFACE

This Supplement to AS 1668, *The use of ventilation of airconditioning in buildings, Part 2: Ventilation design for contaminant control*, was prepared by the Standards Australia Committee ME-062, Ventilation and Airconditioning, to provide background and further information to support the Standard and to assist users in its correct application.

This publication supersedes AS 1668.2 Supp 1—1991, *The use of mechanical ventilation for acceptable indoor air quality—Commentary (Supplement to AS 1668.2—1991)*.

The Commentary to specific clauses of the Standard has been relocated to the main body of the Standard.

SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	4
1.2 REFERENCED DOCUMENTS	4
1.3 DEFINITIONS	5
APPENDICES	
A ENVIRONMENTAL TOBACCO SMOKE HARM INDEX (ETSHI)	6
B VENTILATION EFFECTIVENESS	20
C A PERFORMANCE-BASED APPROACH TO NATURAL VENTILATION SYSTEMS DESIGN	21
D OUTDOOR AIR CONTAMINANT LEVELS	22
E SUPPLEMENTARY MEASURES FOR THE CONTROL OF ETS OR OTHER CONTAMINANTS	23
F A PERFORMANCE-BASED APPROACH TO MECHANICAL VENTILATION SYSTEM DESIGN.....	27
G RATIONALE FOR LAG OR LEAD TIME FOR TRANSIENT OCCUPANCY	29
H COMMENTARY ON CARBON MONOXIDE EXPOSURE IN OCCUPATIONAL ENVIRONMENTS	31
I EXAMPLES OF LAYOUTS OF CAR PARK VENTILATION	33
J BASIS OF AIRFLOW RATES FORMULAE FOR CAR PARKS	37
K BASIS FOR LENGTH OF VEHICLE QUEUE IN CAR PARKS	40
L DERIVATION OF AIRFLOW RATES FOR QUEUING AREAS IN CAR PARKS.....	41
M AUTOMATIC MONITORING SYSTEMS FOR CAR PARKS—MARKING, COMMISSIONING, RELIABILITY AND RECORDS	42
N EMISSIONS FROM BUILDING MATERIALS, FURNISHINGS AND EQUIPMENT	43

STANDARDS AUSTRALIA

Australian Standard

**The use of ventilation and airconditioning in buildings—Ventilation design for indoor air contaminant control
(Supplement 1 to AS 1668.2—2002)**

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE

This supplement provides background and further information on AS 1668.2, to support the Standard and to assist users in its correct application.

Appendix A provides information on a possible relationship between environmental tobacco smoke (ETS) generation rates, ventilation rates and some health outcomes from exposure to ETS.

Appendix B provides information on ventilation effectiveness.

Appendix C provides information on outdoor air contaminant levels.

Appendix E provides information on supplementary measures for the control of ETS or other contaminants.

Appendix F provides information on a performance approach to mechanical ventilation system design.

Appendix G provides information on the rationale for lead and lag time for transient occupancies.

Appendix H provides a commentary on carbon monoxide exposure in occupational environments.

Appendix I provides examples of layouts of car park mechanical ventilation system.

Appendix J provides information on the basis of the airflow rates formulae for car parks.

Appendix K provides information on the basis for length of vehicle queue in car parks.

Appendix L provides information on the derivation of airflow rates for queuing areas in car parks.

Appendix M provides information on the marking, commissioning, reliability and records of automatic monitoring systems for car parks.

Appendix N provides information on emissions from building materials, furnishings and equipment.

1.2 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

AS	
1668	The use of ventilation and airconditioning in buildings
1668.2	Part 2: Ventilation design for indoor air contaminant control
4006	Software test documentation
AS	
4008	Software design documentation
