Vapour may travel to source of ignition and flash back. Liquid is lighter than water. Containers may explode when heated. Fire will produce irritating, poisonous and corrosive gases. Vapours from runoff may create an explosion hazard. Liquid may polymerize violently when heated or involved in a fire.</p>
HEALTH AND ENVIRONMENT	<p>POISONOUS; MAY BE FATAL IF INHALED, SWALLOWED OR ABSORBED THROUGH SKIN. Symptoms of poisoning may be delayed. Dilute mixtures with water are also hazardous. May irritate or burn skin and eyes. Runoff from fire control or dilution water may pollute waterways.</p>
