## PREFACE

This standard for the sampling of textile floor coverings and for the preparation of test specimens from the sample was prepared by the Association's Committee on Carpets, under the direction of the Textile Standards Board, for use in association with AS 2111, Methods of Test for Textile Floor Coverings.

The procedures are based on those specified in—

ISO 1957 Machine-made Textile Floor Coverings—Sampling and Cutting Specimens for Physical Tests

BS 4664 Methods of Sampling and Cutting Specimens for Physical Tests on Textile Floor Coverings.

The techniques apply to the sampling and testing of commercially produced textile floor coverings both with and without pile.
