## Complete, filled transport packages—Methods of test

### Method 1: Identification of parts when testing

---

#### PREFACE

This Standard was prepared by Standards Australia Committee PK-012, Physical Testing of Packages and Containers, to supersede AS 2582.1—1983, *Complete, filled transport packages—Methods of test, Part 1: Identification of parts when testing*. This Standard is identical with and has been reproduced from ISO 2206:1987, *Packaging—Complete, filled transport packages—Identification of parts when testing*.

As this Standard is reproduced from an International Standard, the following modifications apply:

- (a) Its number does not appear on each page of text and its identity is shown on the cover and title page.
- (b) In the source text, ‘this International Standard’ should read ‘this Australian Standard.’
- (c) A full point substitutes for a comma when referring to a decimal marker.
