

Australian Standard™

Castors and wheels

**Part 1: Vocabulary, symbols and
multilingual terminology**

This Australian Standard was prepared by Committee ME-031, Industrial Castors. It was approved on behalf of the Council of Standards Australia on 27 September 2004.
This Standard was published on 15 October 2004.

The following are represented on Committee ME-031:

Australian Chamber of Commerce and Industry
Australian Industry Group
Commercial Furniture Industry Association of Australia
Furntech
Wheel manufacturing interests

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 03002.

Australian Standard™

Castors and wheels

**Part 1: Vocabulary, symbols and
multilingual terminology**

Originated as AS 1961—1977.
Revised and redesignated in part as AS 1961.1—2004.

PREFACE

This Standard was prepared by Standards Australia Committee ME-031, Industrial Castors, to supersede in part AS 1961—1977, *Industrial wheels and castors (dimensions and capacities)*.

This Standard is identical with and has been reproduced from ISO 22877:2004, *Castors and wheels—Vocabulary, symbols and multilingual terminology*.

The objective of this Standard is to provide manufacturers, purchasers and users of industrial wheels and castors with a set of terms and symbols that can be used to make the description of products easier and reduce misunderstandings.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text, ‘this International Standard’ should read ‘this Australian Standard’.

CONTENTS

	<i>Page</i>
Scope	1
1 Definitions relating to wheels	2
2 Definitions relating to axle and mountings	18
3 Definitions relating to castors	19
4 Load capacity and mass	37
Bibliography	39
Symbols list	40
Alphabetical index	41

NOTES

AUSTRALIAN STANDARD

Castors and wheels

Part 1: Vocabulary, symbols and multilingual terminology

Scope

This International Standard defines terms and symbols relating to castors and wheels.

NOTE 1 “Castors and wheels” is the English expression; in other languages the expression may be reversed, for example in French “Roues et roulettes”.

NOTE 2 In addition to terms in English and French (two of the three official ISO languages), this International Standard gives the equivalent terms in German, Finnish, Italian, Dutch and Swedish; these are published under the responsibility of the member bodies for Germany (DIN), Finland (SFS), Italy (UNI), Netherlands (NEN) and Sweden (SIS). However, only the terms and definitions given in the official languages can be considered as ISO terms and definitions.

Domaine d'application

La présente Norme internationale définit les termes et symboles relatifs aux roues et roulettes.

NOTE 1 «Castors and wheels» est une expression anglaise; dans d'autres langues, l'expression peut être inversée, par exemple en français «Roues et roulettes».

NOTE 2 En complément des termes en anglais et français (deux des trois langues officielles de l'ISO), la présente Norme internationale donne les termes équivalents en allemand, finnois, italien, néerlandais et suédois; ces termes sont publiés sous la responsabilité des comités membres allemand (DIN), finnois (SFS), italien (UNI), néerlandais (NEN) et suédois (SIS). Toutefois, seuls les termes et définitions donnés dans les langues officielles peuvent être considérés comme étant des termes et définitions de l'ISO.
