

Australian Standard[®]

**DENSITY OF MERCURY—
NUMERICAL VALUE**

This Australian standard was prepared by Committee MS/10, Quantities, Units, and Conversions. It was approved on behalf of the Council of the Standards Association of Australia on 7 January 1986 and published on 3 February 1986.

The following interests are represented on Committee MS/10:

Australian Institute of Physics
Bureau of Steel Manufacturers of Australia
CSIRO, Division of Applied Physics
Department of Defence
Department of Science
Electricity Commission of New South Wales
Monash University
National Standards Commission
University of New South Wales
University of Sydney

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 85294.

PREFACE

This standard was prepared by the Association's Committee on Quantities, Units, and Conversions. It is based on the data contained in the Determination by the National Standards Commission—Recognised-value Standard of Measurement of Density—Mercury, dated 21 March 1985, in accordance with the National Measurement Act 1960.

This standard sets out two ways of ascertaining the numerical value of the density of mercury under specified conditions, viz by reference to a table and by calculation.

It was considered that it would be of benefit if information on the density of mercury were specified in an Australian standard and application standards could then make reference to this standard.

In the preparation of this standard, reference was made to—

National Standards Commission—Recognised-value Standard of Measurement of Density—Mercury; and

Technical Memorandum No 17—Notes on the Density of Mercury and Water, published by CSIRO, Division of Applied Physics.

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
