

Australian/New Zealand Standard™

**Gas appliances**

**Part 1.5: Domestic gas refrigerators**

AS/NZS 5263.1.5:2019

This Joint Australian/New Zealand Standard™ was prepared by Joint Technical Committee AG-001, Gas Appliances. It was approved on behalf of the Council of Standards Australia on 5 August 2019 and by the New Zealand Standards Approval Board on 7 August 2019.

This Standard was published on 2 September 2019.

The following are represented on Committee AG-001:

- Association of Accredited Certification Bodies
- Australian Gas Association
- Australian Industry Group
- Consumer Electronics Suppliers Association
- Consumers Federation of Australia
- Energy Networks Australia
- Gas Appliance Manufacturers Association of Australia
- Gas Association of New Zealand
- Gas Energy Australia
- Gas Technical Regulators Committee
- Gas Utilisation Institute, New Zealand
- Joint Accreditation System of Australia and New Zealand
- NSW Fair Trading
- WorkSafe New Zealand - Energy Safety

This Standard was issued in draft form for comment as DR AS/NZS 5263.1.5:2018.

# Australian/New Zealand Standard™

## Gas appliances

### Part 1.5: Domestic gas refrigerators

Originated in Australia as AG 105—1977.  
Previous edition AS 4555—2002 (AG 105—2002).  
Jointly revised and redesignated as AS/NZS 5263.1.5:2019.

## Preface

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee AG-001, Gas Appliances, to supersede AS 4555—2002/AG 105—2002, *Domestic gas refrigerators*.

This Standard provides particular requirements for domestic gas refrigerators that apply in addition to or in place of the general requirements for gas appliances set out in AS/NZS 5263.0, *Gas appliances*, Part 0: *General requirements*. The combination of AS/NZS 5263.1.5 and AS/NZS 5263.0 supersedes AS 4555—2002/AG 105—2002.

This Part 1.5 of AS/NZS 5263, supplements or modifies the corresponding clauses of Part 0. The numbering of clauses in this Part 1.5 is consistent with the numbering in Part 0 for related requirements.

Statements used in this Part 1.5 to explain the relationship of clauses in this Standard to the corresponding clauses of Part 0 are as follows:

- (a) “This Clause of AS/NZS 5263.0 applies”, in which case the corresponding clause of Part 0 and its subclauses are used without modification.
- (b) “This Clause of AS/NZS 5263.0 applies, except as modified below”, in which case the corresponding clause of Part 0 and its subclauses are used but with the modifications, as listed in this document.
- (c) “Not applicable”, in which case the corresponding clause of Part 0 is not used in this context.

Otherwise the text in this Standard replaces the corresponding clause of Part 0.

Any clauses in this Standard that are additional to the requirements of Part 0 are numbered beginning from 101 (except for additional definitions, which begin from 201). Additional appendices in this Part 1.5 are designated with letters starting from AA, or numbered beginning from 101 (e.g. ZA.101).

Where an appendix, or part of an appendix (i.e. clause, figure, or table) is cited in this Standard, reference should first be made to Part 0 for the content of the appendix, which may be modified by this Part 1.5.

This Standard (AS/NZS 5263.1.5), together with the Standard AS/NZS 5263.0 (Part 0), constitute a means of conformance to AS 3645, *Essential requirements for gas equipment*, for domestic gas refrigerators.

The objective of this Standard is to provide manufacturers, designers, regulatory authorities, conformity assessment bodies and similar organizations with uniform minimum requirements for the safety, performance and use of gas appliances.

This Standard should not be regarded as a design specification or as an instruction manual. Consideration has been given to —

- (i) continuity of satisfactory operation;
- (ii) the prevention of fire hazards and explosions;
- (iii) the prevention of injury to persons or property;
- (iv) gas rules and regulations now in force; and
- (v) relevant International Standards.

AS/NZS 5601 series of Standards provides essential requirements and means of conformance for gas installations. Any reference to “AS/NZS 5601” in AS/NZS 5263 series of Standards should be considered as reference to the appropriate part of the AS/NZS 5601 series of Standards (i.e. AS/NZS 5601.1 or AS/NZS 5601.2).

The terms “normative” and “informative” are used in Standards to define the application of the appendix to which they apply. A “normative” appendix is an integral part of a Standard, whereas an “informative” appendix is only for information and guidance.

# Australian/New Zealand Standard

## Gas appliances

### Part 1.5: Domestic gas refrigerators

#### Section 1 Scope and general

##### 1.1 Scope and application

###### 1.1.1 Scope

This Standard provides specific requirements and test methods for domestic gas refrigerators with energy input not exceeding 50 MJ/h.

For Australia, the fuel gases are natural gas (as described by AS 4564), town gas, liquefied petroleum gas (LP Gas, as described by AS 4670), simulated natural gas (SNG) and tempered liquefied petroleum gas (TLP).

For New Zealand:

- (a) The fuel gases are natural gas (as specified in NZS 5442) and general product liquefied petroleum gas (NZLPG, as specified in NZS 5435).
- (b) The thermal efficiency requirements ([Clause 5.12](#)) are informative only, except where they relate to safety.

[Appendix AA](#) provides figures referenced in this Standard that are in addition to those in AS/NZS 5263.0.

NOTE Other statutory or regulatory requirements may be applicable to a product that falls within the scope of this Standard. It is the responsibility of the manufacturer, importer or distributor (as appropriate) to ensure that products conform to such requirements.

Test methods are set out in [Appendices ZA, ZB](#) and [ZC](#) (see [Clause 1.4](#)).

###### 1.1.2 Application

This Standard is complementary to, and is intended to be used in conjunction with AS/NZS 5263.0. The requirements given herein shall take precedence over corresponding requirements in that Standard.

AS 3645 specifies essential requirements for gas equipment that requires regulatory approval before sale. This Standard, together with AS/NZS 5263.0, is intended to provide a means of demonstrating conformance to AS 3645.

##### 1.2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document:

NOTE Documents for informative purposes are listed in the Bibliography.

AS 4627, *Quick-connect devices for gas*

AS/NZS 5263.0, *Gas appliances, Part 0: General requirements*

##### 1.3 Terms and definitions

For the purposes of this standard the terms and definitions of AS/NZS 5263.0 and the following apply.
