AMSC: N/A

AREA: 1370

DISTRIBUTION STATEMENT A. Approved for public release: distribution unlimited.

1. SCOPE.

1.1 Scope. This specification covers the performance requirements for one (1) type of airborne personnel distress signal kit designated A/P25S-5B and consisting of a hand-fired launcher and a bandoleer assembly containing seven (7) red signals.

2. APPLICABLE DOCUMENTS

2.1 General. The documents listed in this section are cited in sections three (3) and four (4) of this specification. This section does not include documents cited in other sections of this specification or recommended for additional information or as examples. While every effort has been made to ensure the completeness of this list, document users are cautioned that they must meet the specified requirements documents cited in sections three (3) and four (4) of this specification, whether or not they are listed.

2.2 Government Documents.

2.2.1 Specifications, standards, and handbooks. The following specifications, standards, and handbooks form a part of this document to the extent specified herein. Unless otherwise specified, the issues of the documents are those cited in the solicitation of contract. (see 6.2)

MIL-STD-1916	DoD Preferred Methods for Acceptance of Product
MIL-STD-331	Department of Defense Test Method Standard

(Copies of these documents are available online at <https://assist.dla.mil>.)

2.3 Non-Government publications. N/A

2.4 Order of precedence. Unless otherwise noted herein or in the contract, in the event of a conflict between the text of this document and the references cited herein, the text of this document takes precedence. Nothing in this document supersedes applicable laws and regulations unless a specific exemption has been obtained.

3. REQUIREMENTS.

3.1 First article. When specified (see 6.2), a sample shall be subjected to first article inspection in accordance with 4.2.

3.2 Recycled, recovered, or environmentally preferable materials. Recycled, recovered, or environmentally preferable materials shall be used to the maximum extent possible provided that the material meets or exceeds the operational and maintenance requirements, and promotes economically advantageous life cycle cost.
