ASABE is a professional and technical organization, of members worldwide, who are dedicated to advancement of engineering applicable to agricultural, food, and biological systems. ASABE Standards are consensus documents developed and adopted by the American Society of Agricultural and Biological Engineers to meet standardization needs within the scope of the Society; principally agricultural field equipment, farmstead equipment, structures, soil and water resource management, turf and landscape equipment, forest engineering, food and process engineering, electric power applications, plant and animal environment, and waste management.

NOTE: ASABE Standards, Engineering Practices, and Data are informational and advisory only. Their use by anyone engaged in industry or trade is entirely voluntary. The ASABE assumes no responsibility for results attributable to the application of ASABE Standards, Engineering Practices, and Data. Conformity does not ensure compliance with applicable ordinances, laws and regulations. Prospective users are responsible for protecting themselves against liability for infringement of patents.

ASABE Standards, Engineering Practices, and Data initially approved prior to the society name change in July of 2005 are designated as "ASAE", regardless of the revision approval date. Newly developed Standards, Engineering Practices and Data approved after July of 2005 are designated as "ASABE".

Standards designated as "ANSI" are American National Standards as are all ISO adoptions published by ASABE. Adoption as an American National Standard requires verification by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by ASABE.

Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution.

CAUTION NOTICE: ASABE and ANSI standards may be revised or withdrawn at any time. Additionally, procedures of ASABE require that action be taken periodically to reaffirm, revise, or withdraw each standard.

No part of this publication may be reproduced in any form, including an electronic retrieval system, without the prior written permission of ASABE. All request pertaining to the ANSI/ASAE S390.7 JAN2022 (adoption of ISO 12934:2021) Standard should be submitted to ASABE.

Proposed by the Engineering Policy Committee of the Farm and Industrial Equipment Institute; approved by the ASAE Power and Machinery Division Standards Committee; adopted by ASAE March 1978; reaffirmed December 1982; revised February 1984; reaffirmed December 1988; December 1993, December 1994, December 1996, December 1997, December 1998; revised January 2001, June 2001, January 2005; approved as an American National Standard February 2005; periodic review extension for two years approved July 2009; revised January 2011; reaffirmed January 2016; revised December 2016; January 2022 to replace with ISO 12934:2021.

Keywords: Definitions, Equipment, Machinery

0 Foreword

0.1 ANSI/ASAE S390.7 (ISO 12934:2021), Tractors and machinery for agriculture and forestry — Basic types — Vocabulary, is an adoption without modification of the identically titled ISO 12934:2021, Tractors and machinery for agriculture and forestry — Basic types — Vocabulary.

0.2 ANSI/ASAE S390.7 (ISO 12934:2021) provides terms and definitions for agricultural field equipment designed primarily for use in agricultural operations for the production of food and fibre.

This document also applies to agricultural tractors used in forestry applications. Purpose-built forestry machines, as defined by ISO 6814, are not included.

0.3 No normative references are listed in ISO 12934:2021. The responsible ASABE committee has reviewed and approved no normative references for the identical adoption of the ISO 12934:2021, Tractors and machinery for agriculture and forestry — Basic types — Vocabulary.

0.4 This standard has been approved as an American National standard by ANSI (American National Standard Institute). The original content of ISO 12934 was based on ASAE S390.

Text of ISO 12934:2021, Tractors and machinery for agriculture and forestry — Basic types — Vocabulary, follows.

1 Scope

This document provides terms and definitions for agricultural field equipment designed primarily for use in agricultural operations for the production of food and fibre.

This document also applies to agricultural tractors used in forestry applications. Purpose-built forestry machines, as defined by ISO 6814, are not included.
