

AS 4687.2:2022

# Temporary fencing and hoardings

## Part 2: Temporary fencing and temporary pedestrian barriers

AS 4687.2:2022

This Australian Standard ® was prepared by CE-008, Chainlink Fabric Security Fences and Gates. It was approved on behalf of the Council of Standards Australia on 8 June 2022.

This Standard was published on 24 June 2022.

The following are represented on Committee CE-008:

- Australasian Wind Engineering Society
- Australasian Wire Industry Association
- Australian Industry Group
- Australian Institute of Health and Safety
- Australian Security Industry Association
- Bureau of Steel Manufacturers of Australia
- Civil Contractors Federation
- Consult Australia
- Engineers Australia
- Galvanizers Association of Australia
- Hire and Rental Industry Association of Australia
- National Association of Testing Authorities Australia
- Swimming Pool and Spa Association of Australia
- Temporary Fencing Association of Australia

This Standard was issued in draft form for comment as DR AS 4687.2:2021.

## Preface

This Standard was prepared by the Standards Australia Committee CE-008, Chainlink Fabric Security Fences and Gates, to supersede AS 4687:2007, *Temporary fencing and hoardings*.

The objective of this document is to specify minimum requirements for the design, installation and performance of temporary fencing and temporary pedestrian barriers, in order to provide protection to the public.

Temporary fencing is used —

- (a) to restrict unauthorized access to worksites, events and restricted areas;
- (b) to prevent operations within the fenced area from having effects outside of the fenced area; and
- (c) to prevent exposure of the public to hazards within the fenced area.

Temporary pedestrian barriers are used —

- (i) to provide a temporary directional barrier for pedestrian traffic management;
- (ii) to protect pedestrians from hazards; and
- (iii) to delineate access zones.

The major changes in this edition are as follows:

- (A) Additional guidance has been provided for determination of wind actions.
- (B) The test methods have been elaborated upon.
- (C) Where the previous edition was a performance testing standard, this revision provides alternative ways to achieve conformance, adding a design analysis approach.
- (D) Inclusion of new material regarding temporary pedestrian barriers.
- (E) Division of the previous edition of the document into a series of four parts, comprising the following:
  - (i) AS 4687.1, *Temporary fencing and hoardings, Part 1: General requirements*.
  - (ii) AS 4687.2, *Temporary fencing and hoardings, Part 2: Temporary fencing and temporary pedestrian barriers*.
  - (iii) AS 4687.3, *Temporary fencing and hoardings, Part 3: Temporary hoardings*.
  - (iv) AS 4687.4, *Temporary fencing and hoardings, Part 4: Temporary swimming pool fencing*.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

## Temporary fencing and hoardings

### Part 2: Temporary fencing and temporary pedestrian barriers

#### Section 1 Scope and general

##### 1.1 Scope

This document specifies minimum requirements for the design, installation and performance of temporary fencing and temporary pedestrian barriers in order to provide protection to the public.

Temporary fencing is used —

- (a) to restrict unauthorized access to worksites, events and restricted areas;
- (b) to prevent operations within the fenced area from having effects outside of the fenced area; and
- (c) to prevent exposure of the public to hazards within the fenced area.

Temporary pedestrian barriers are used —

- (i) to provide a temporary directional barrier for pedestrian traffic management;
- (ii) to protect pedestrians from hazards; and
- (iii) to delineate access zones.

##### 1.2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document:

AS 4687.1, *Temporary fences and hoardings — Part 1: General requirements*

##### 1.3 Terms and definitions

For the purposes of this document, the terms and definitions given in AS 4687.1 and the following apply.

###### 1.3.1

###### **installation instructions**

procedure which comprehensively describes how to assemble the temporary barrier on site

Note 1 to entry: This includes the position and number of fasteners, upright spacing, all materials, stability systems, bracing system and counterweights required.

###### 1.3.2

###### **plate**

support, including spigots, to receive the legs that maintain the panel in vertical alignment for a temporary barrier
