## **American National Standard**

Designation of this document as an American National Standard attests that the principles of openness and due process have been followed in the approval procedure and that a consensus of those directly and materially affected by the standard has been achieved.

This standard was developed under the procedures of the Standards Committee of the American Nuclear Society; these procedures are accredited by the American National Standards Institute, Inc., as meeting the criteria for American National Standards. The consensus committee that approved the standard was balanced to assure that competent, concerned, and varied interests have had an opportunity to participate.

An American National Standard is intended to aid industry, consumers, governmental agencies, and general interest groups. Its use is entirely voluntary. The existence of an American National Standard, in and of itself, does not preclude anyone from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standard.

By publication of this standard, the American Nuclear Society does not insure anyone utilizing the standard against liability allegedly arising from or after its use. The content of this standard reflects acceptable practice at the time of its approval and publication. Changes, if any, occurring through developments in the state of the art, may be considered at the time that the standard is subjected to periodic review. It may be reaffirmed, revised, or withdrawn at any time in accordance with established procedures. Users of this standard are cautioned to determine the validity of copies in their possession and to establish that they are of the latest issue.

The American Nuclear Society accepts no responsibility for interpretations of this standard made by any individual or by any ad hoc group of individuals. Requests for interpretation should be sent to the Standards Department at Society Headquarters. Action will be taken to provide appropriate response in accordance with established procedures that ensure consensus on the interpretation.

Comments on this standard are encouraged and should be sent to Society Headquarters.

## Foreword

(This Foreword is not a part of American National Standard Criteria for Emergency Response Plans and Implementing Procedures, ANSI/ANS-3.8.3-1987.)

All nuclear power plant owner organizations are required by federal regulations to have a detailed Emergency Response Plan. The plant operators are required to perform routine and abnormal actions in a manner to minimize the likelihood of any particular event developing into an emergency condition. An objective of sound operation is to prevent emergency conditions. The objective of an emergency response program is emergency mitigation. The plant operators are the key to emergency prevention and mitigation at all times.

If a situation arises which activates the Emergency Response Plan, the plant operators identify developing trends and take the appropriate action to prevent or mitigate a radiological release. The plant operators identify the need for emergency support, make initial contact with emergency response organizations, and activate the Emergency Response Plan. As the emergency develops, the administrative, notification, and coordinating functions are transferred from the plant operators to other individuals within the emergency organization as defined in the Emergency Response Plan. Regardless of the functions shifted from the plant operators to the emergency organization the responsibility for placing the plant in a safe configuration remains with the plant operators.

The ANS-3.8 series of standards provide guidance to new nuclear power plant utilities pertaining to Emergency Response Plan preparation based upon the experience of the licensed nuclear facilities. The American National Standards in this series are:

ANSI/ANS-3.8.1-1987—Criteria for Emergency Response Functions and Organizations

ANSI/ANS-3.8.2-1987—Criteria for Functional and Physical Characteristics of Emergency Response Facilities

ANSI/ANS-3.8.3-1987—Criteria for Emergency Response Plans and Implementing Procedures

ANSI/ANS-3.8.4-1987—Criteria for Maintaining Emergency Response Capability.

The American Nuclear Society Working Group 3.8 had the following members at the time this standard was processed and approved:

W. E. Webb, Jr., Chairman, *Tennessee Valley Authority*  
E. D. Testa, *U.S. Nuclear Regulatory Commission*  
E. E. M. Lloyd, *EXITECH*  
R. Kankus, *Philadelphia Electric Company*

E. L. DeMeritt, *Rochester Gas and Electric Corporation*  
R. W. Myers, *Sacramento Municipal Utility District*  
E. J. Michael, *Stone & Webster Engineering Corporation*

Other significant contributors:

E. Bradley, *Sacramento Municipal Utility District*  
G. Butterworth, *Westinghouse Electric Corporation*  
J. Cumiskey, *Stone & Webster Engineering Corporation*  
M. Glover, *Duke Power Corporation*  
E. F. Williams, *U.S. Nuclear Regulatory Commission*

The membership of Subcommittee ANS-3, Reactor Operations and Support Systems, at the time of its approval of this standard was:

W. T. Ullrich, Chairman, *Philadelphia Electric Company*  
T. M. Anderson, *Westinghouse Electric Corporation*  
B. A. Boger, *U.S. Nuclear Regulatory Commission*  
J. F. Colvin, *Institute of Nuclear Power Operations*  
W. T. Cottle, *Watts Bar Nuclear Plant*  
F. A. Dougherty, *TERA Corporation*  
N. S. Elliott, *Westinghouse Electric Corporation*  
T. W. Fitzgerald, *American Nuclear Insurers*  
H. J. Green, *Consultant*  
E. Jackson, *Vermont Yankee Nuclear Power Corporation*  
P. McKee, *U.S. Nuclear Regulatory Commission*  
T. Murray, *Toledo Edison Company*  
R. J. Rodriguez, *Sacramento Municipal Utility District*  
D. Roth, *General Physics Corporation*  
J. E. Smith, *J. Ed's Nuclear Service Corporation*  
P. Walzer, *Public Service Electric & Gas Company*  
J. P. Zilinskas, *General Electric Company*

The American Nuclear Society's Nuclear Power Plant Standards Committee (NUPPSCO) had the following membership at the time of its approval of this standard.

L. J. Cooper, Chairman  
Marilyn D. Weber, Secretary

R. V. Bettinger . . . . . Pacific Gas and Electric Company  
F. Boorboor . . . . . United Engineers and Constructors  
W. S. Brown . . . . . Westinghouse Electric Corporation  
C. O. Coffey . . . . . Pacific Gas and Electric Company  
L. J. Cooper . . . . . Nebraska Public Power District  
(for the American Nuclear Society)  
J. D. Crawford . . . . . Combustion Engineering, Inc.  
W. H. D'Ardenne . . . . . General Electric Company  
S. B. Gerges . . . . . NUS Corporation  
C. J. Gill . . . . . Bechtel National, Inc.  
J. W. Hufham . . . . . Tennessee Valley Authority  
C. E. Johnson . . . . . U.S. Nuclear Regulatory Commission  
R. T. Lancet . . . . . Rockwell International Corporation  
J. F. Mallay . . . . . Management Analysis Company  
P. T. Reichert . . . . . Stearns Catalytic, Inc.  
W. M. Rice . . . . . Duke Power Company  
(for the Institute of Electrical and Electronics Engineers, Inc.)  
M. O. Sanford . . . . . GPU Nuclear Corporation  
S. L. Stamm . . . . . Stone & Webster Engineering Corporation  
J. D. Stevenson . . . . . Stevenson and Associates  
(for the American Society of Civil Engineers)  
T. J. Sullivan . . . . . Institute of Nuclear Power Operations  
C. D. Thomas . . . . . Yankee Atomic Electric Company  
W. T. Ullrich . . . . . Philadelphia Electric Company  
G. P. Wagner . . . . . Commonwealth Edison Company  
G. L. Wessman . . . . . Torrey Pines Technology  
J. E. Windhorst . . . . . Southern Company Services  
G. A. Zimmerman . . . . . Portland General Electric Company
